Introductory Section

We exercise global leadership to ensure the sustainability of our pension and health benefit systems.

Fred Buenrostro
Chief Executive Officer

December 20, 2006

Members of the CalPERS Board of Administration:

I am pleased to present the CalPERS Comprehensive Annual Financial Report (CAFR) and accompanying Operations Summary for the year ended June 30, 2006.

Fiscal year 2005-06 was a year of progress for our organization. In November 2005, we reached a milestone of \$200 billion in assets. This remarkable achievement reflects our diversified investment strategy and the diligence of our investment staff.

Our sound investment strategy resulted in an 11.8 percent return for the fiscal year, making this the third consecutive year of double-digit returns. We enhanced returns through prudent investment selection and value-adding activities, while mitigating risk through diversification and thoughtful risk management. We continued to seek investments that reflect our commitment to environmental stewardship and the needs of future generations. In our ongoing efforts to promote responsible corporate governance, we pursued formal executive compensation policies that are subject to shareowner approval and greater corporate transparency regarding environmental threats. We are pleased that some corporations are recognizing that our involvement can help strengthen companies in ways that create long-term value for shareowners.

During the fiscal year, we revised our Strategic Plan, which centers on 12 goals that guide us in serving nearly 1.5 million members and almost 2,600 public employers. At the heart of the plan is our commitment to maintaining high-quality customer service, ensuring the security of pension benefits, providing the best value in health benefits, and managing our investment portfolio well.

As outlined in our Strategic Plan, we believe diversity is a fundamental business issue. Diversity in investing enables

CEO Letter of Transmittal (continued)

us to leverage the unique talents of every investment partner and to obtain good returns. And while we will seek diversity, every investment must stand on its own merits. As part of our commitment to diversity, we partnered with the California State Teachers' Retirement System to hold a Diversity Investment Conference. Nearly 600 individuals representing investment-related organizations joined us to explore best practices and learn about increasing investment opportunities through diversity.

In managing our health benefits program, we have executed a variety of strategic initiatives designed to make every health care dollar count, and our efforts are seeing results. In February 2006, the Legislative Analyst's Office credited us with saving up to \$168 million since 2002. We will continue to pursue transparency about the true costs of health care to ensure that our members receive the best value for their health care dollars.

Public employers will face significant challenges as a result of the new Governmental Accounting Standards Board requirements regarding accounting for retiree medical benefits. We are beginning to explore innovative ways to assist employers in meeting those requirements.

As the fiscal year began, the expansion of our headquarters was completed. Our three-building complex allows us to better serve members and provides room for future growth. On an operational level, our commitment to responsive customer service was demonstrated through enhancements to several of our service delivery processes. Our long-term plans to create a state-of-the-art information technology system advanced significantly this year. The centerpiece of that system is a Web-based, self-service oriented design that is cost-effective, efficient, and expandable. We responded effectively to changes in the guidelines governing disability retirement determinations, eliminating backlogs through an aggressive effort.

Our employees are our most valuable asset, and in response to employee input, we began to implement several initiatives to enhance employee satisfaction. The initiatives address open communication and employee engagement; growth and development; accountability for performance; and managing workload. I want to thank our employees for their teamwork and dedication to our core values, goals, and mission. Together, they are the finest workforce in the

State. I also want to thank the Board for their guidance and responsiveness.

I encourage you to review the information in this report. It provides information on all the programs administered by CalPERS: Public Employees' Retirement Fund (PERF), Legislators' Retirement Fund (LRF), Judges' Retirement Fund (JRF), Judges' Retirement Fund II (JRF II), Volunteer Firefighters' Length of Service Award Fund (VFF), State Peace Officers' and Firefighters' Defined Contribution Plan Fund (SPOFF), Health Care Fund (HCF), Contingency Reserve Fund (CRF), Old Age & Survivors' Insurance Revolving Fund (OASI), Replacement Benefit Fund (RBF), Supplemental Contributions Program Fund (SCPF), Long-Term Care Fund (LTCF), Deferred Compensation Fund (DCF), Public Agency Deferred Compensation Program (IRC 457), and the Special Deposit Fund (SDF).

Beginning in 1932, the System began providing services to State employees. In 1939, public agencies and school districts were allowed to contract with CalPERS to provide retirement benefits for their employees. While primarily responsible for administering retirement, death, and health benefits, CalPERS also administers supplemental retirement savings plans and long-term care insurance. As a service to members and employers, a variety of educational workshops and seminars are also offered.

Management Responsibility for Financial Reporting

The CalPERS financial statements included in this CAFR for the 2005-06 fiscal year have been prepared by System management, which is responsible for the integrity and fairness of the data presented, including the many amounts that out of necessity must be based on estimates and judgments. The accounting policies followed in preparation of these financial statements conform with accounting principles generally accepted in the United States. Financial information presented throughout this Annual Report is consistent with these financial statements.

CalPERS maintains a system of internal controls designed to provide reasonable assurance that assets are properly safeguarded, transactions are properly executed, and financial statements are reliable. In addition, internal audit personnel provide a continuing review of the internal controls and operations of CalPERS, and the Chief of

CEO Letter of Transmittal (continued)

the Office of Audit Services regularly reports to the CalPERS Board of Administration's Finance Committee. The Committee reviews the audit findings and recommendations for improvements in internal control and operational efficiency and the actions of management to implement such recommendations.

Our independent external auditors, Deloitte & Touche LLP, have conducted an audit of the basic financial statements in accordance with auditing standards generally accepted in the United States of America, performing such tests and other procedures as they deem necessary to express an opinion in their report to the Board. The external auditors also have full and unrestricted access to the Board to discuss their audit and related findings as to the integrity of the financial reporting and adequacy of internal control systems.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to CalPERS for our Comprehensive Annual Financial Report for the fiscal year ended June 30, 2005. This was the ninth consecutive year that CalPERS has achieved this prestigious award.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year. We believe our current comprehensive annual report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate.

The Comprehensive Annual Financial Report

This report consists of five sections:

Introductory — contains this introduction letter and our organizational chart. Summary program information is

contained in the accompanying 2005-06 Comprehensive Annual Financial Report Operations Summary;

Financial — presents management's responsibility for financial reporting and the independent auditors' opinion on the CalPERS basic financial statements, management's discussion and analysis, and sections on required supplemental schedules and supporting schedules;

Investment — summarizes and presents performance information for the PERF, JRF, JRF II, LRF, and VFF;

Actuarial — contains the certifications and results of the actuarial valuations as of June 30, 2005, the latest data available;

Statistical — contains significant membership and retirement data for CalPERS, Judges' Retirement System, Judges' Retirement System II, Legislators' Retirement System, Volunteer Firefighters' Length of Service Award System, Health Benefits Program, Deferred Compensation Program, and Long-Term Care Program.

Accounting System & Reports

Management is responsible for establishing and maintaining an internal control structure designed to ensure that CalPERS assets are protected from loss, theft, or misuse, and income is equally distributed. Responsibility for the accuracy, completeness, and fair presentation of the information, and all disclosures, rests with CalPERS. The basic financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The basic financial statements are presented in accordance with pronouncements of the Governmental Accounting Standards Board (GASB), including standards established by GASB Statement No. 25, Financial Reporting for Defined Benefit Plans; GASB Statement No. 26, Financial Reporting for Post Employment Health Care Plans Administered by Defined Benefit Plans; GASB Statement No. 34, Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments; and other GASB statements as appropriate.

CEO Letter of Transmittal (continued)

GASB Statement No. 34 requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of a Management's Discussion and Analysis (MD&A). This Letter of Transmittal is designed to complement the MD&A and should be read in conjunction with it. The CalPERS MD&A can be found immediately following the report of the independent auditors.

Investments

Proper funding and healthy long-term investment returns are essential to the financial soundness of CalPERS. The ratio of investment earnings to total revenue during the last 10 years is evidence of the System's continued solid financial management.

Asset Allocation

An integral part of the overall investment policy is the strategic asset allocation policy. This is designed to provide an optimal mix of asset classes with return expectations that reflect expected liabilities. This emphasizes a maximum diversification of the portfolio that protects the fund from declines that a particular asset class may experience in a given period. Both traditional assets (cash, bonds, domestic stocks, domestic fixed income, and mortgages) and nontraditional assets (real estate, international stocks and fixed income, venture capital, timber investments, and leveraged buyouts) are incorporated into the mix.

Funding

The bottom line for a retirement system is its level of funding. If the funding level is adequate, the ratio of total accumulated assets to total liabilities will be larger and the need for contributions will be reduced. Also, an adequate funding level gives participants assurance that their pension benefits are secure.

The historical level of funding for the PERF is good. As of June 30, 2005, the PERF is 87.3 percent funded. The advantages of a well-funded plan are that participants can see assets that are irrevocably committed to the payment of promised benefits, and employees and taxpayers can

minimize their contributions in support of defined benefits. The Required Supplemental Schedules to the Basic Financial Statements and the Actuarial Section contain a summary of CalPERS unfunded actuarial accrued liabilities.

Investment returns are used to generate additional revenues and, ultimately, this allows CalPERS to reduce employer contribution rates, reducing pension costs to employers and taxpayers.

In Closing...

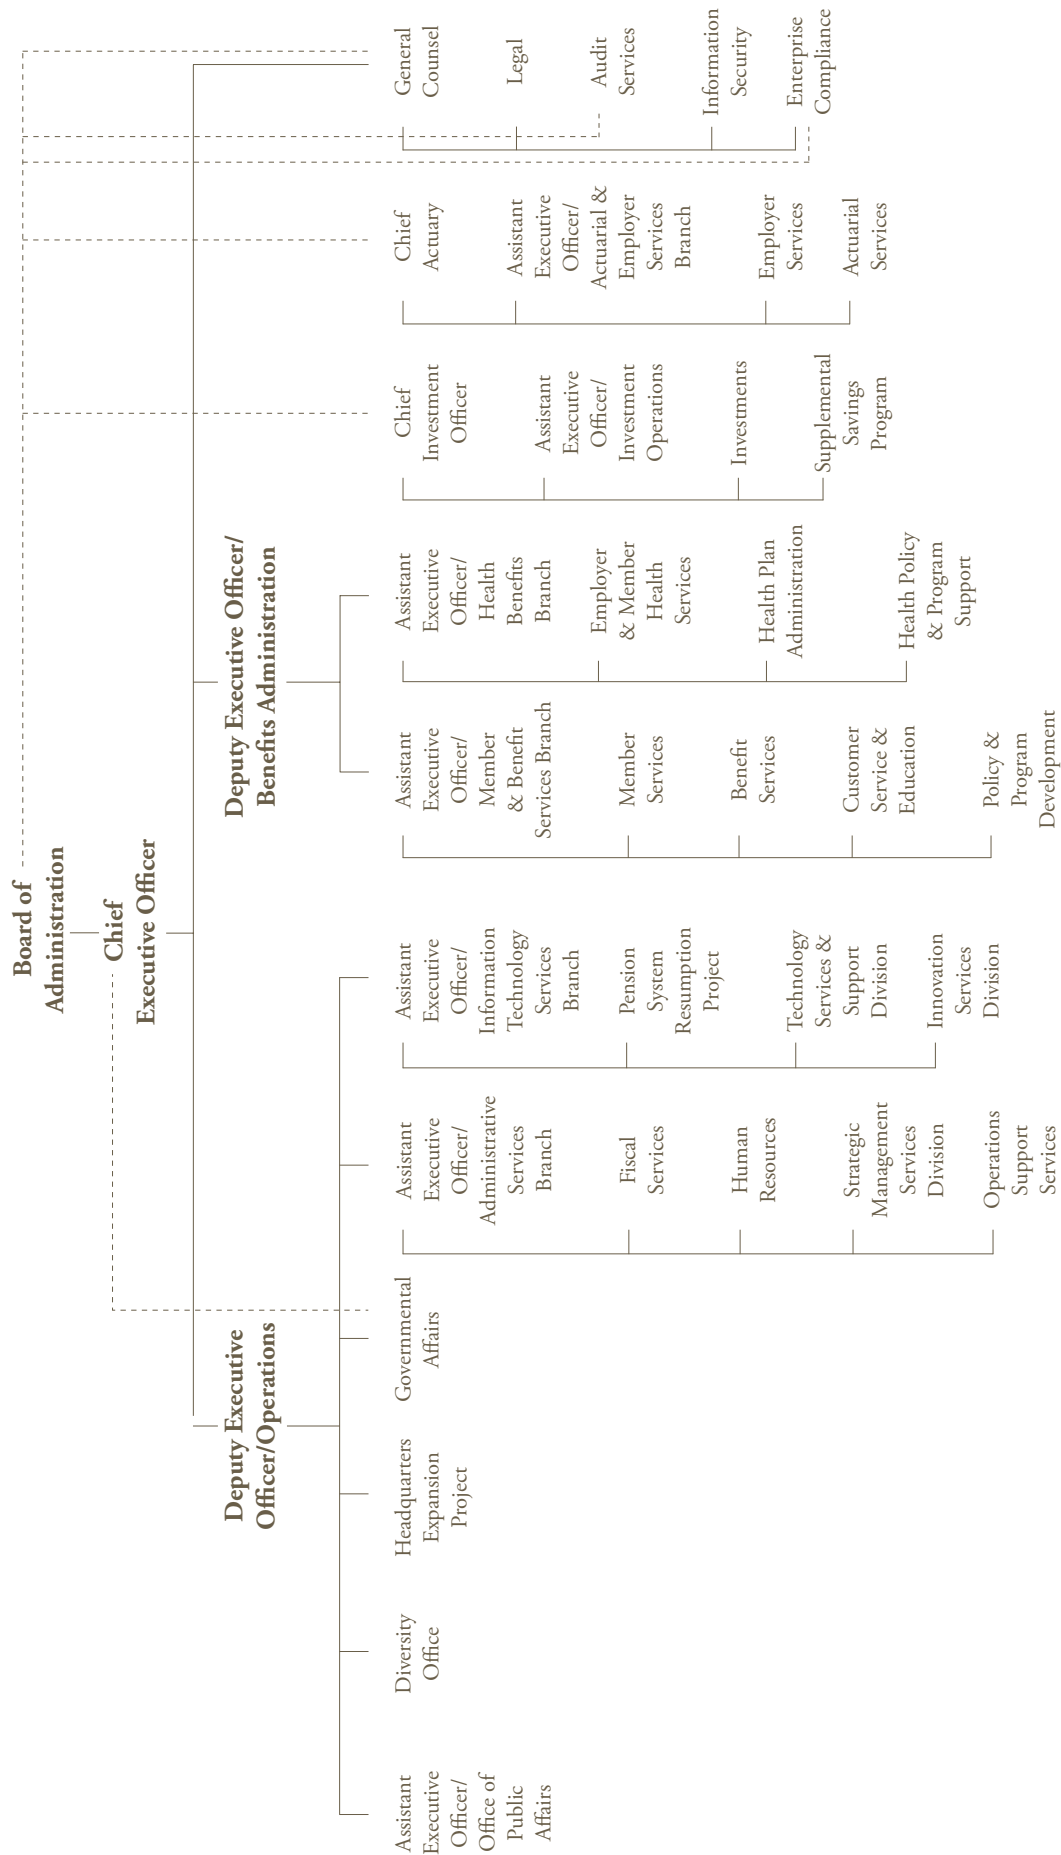

During the coming fiscal year, we will be celebrating our 75th anniversary. As we do so, I am encouraging our staff to envision ways that CalPERS can become an integrated full-service provider of financial and health-related products and services. We will continue to explore new programs and initiatives that will meet the changing needs of members and employers.

While efforts to replace defined benefit plans with defined contribution plans were less active during this fiscal year, the debate has not ended. CalPERS will remain vigilant. We will continue to serve as an educational resource on the advantages of defined benefit plans and oppose efforts to replace or water down such plans.

Fred Buenrostro

Independent Auditors' Report

To the Board of Administration
California Public Employees' Retirement System
Sacramento, California

We have audited the accompanying statement of fiduciary net assets of the fiduciary funds, and the statement of net assets of the proprietary funds, and the statement of changes in assets and liabilities of the agency funds of the California Public Employees' Retirement System (the "System"), a component unit of the State of California, as of June 30, 2006, and the related statements of changes in fund net assets of the fiduciary and proprietary funds and of cash flows from the proprietary funds for the year then ended. These basic financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these basic financial statements based on our audits. The comparative totals as of and for the year ended June 30, 2005, presented in the basic financial statements are included for additional analysis only.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such basic financial statements referred to above present fairly, in all material respects, the fiduciary net assets of the fiduciary funds, the changes in assets and liabilities of the agency funds and the net assets of the proprietary funds of the System as of June 30, 2006, and the related changes in fiduciary net assets and the operations and cash flows for the proprietary funds for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

Report of Independent Accountants (continued)

As discussed in Note 5 to the basic financial statements, actual contributions to the Judges' Retirement Fund made by the State of California were materially less than the actuarially determined annual required contribution. Additionally, current year contributions made by the State of California were used to pay current year benefits. Management and legal counsel believe that the State of California is legally required to provide funding sufficient to pay benefits when due.

Management's Discussion and Analysis on pages 10 through 28 is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board ("GASB"). This supplementary information is the responsibility of the System's management. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit such information and we do not express an opinion on it.

Our audits were conducted for the purpose of forming an opinion on the System's basic financial statements taken as a whole. The supplemental information included in pages 57 through 65 is presented for the purpose of additional analysis, as required by GASB, and is not a required part of the basic financial statements. This supplementary information by fund is the responsibility of the System's management. Such supplementary information has been subjected to the auditing procedures applied in our audits of the 2006 basic financial statements and, in our opinion, is fairly stated in all material respects when considered in relation to the 2006 basic financial statements taken as a whole. The required supplemental information for the years ended June 30, 2001, 2000, 1999, 1998, and 1997 was audited by other auditors in connection with their audits of the respective financial statements, on which they expressed an unqualified opinion. The supplemental information included in pages 67 through 73 is presented for purposes of additional analysis and is not a required part of the 2006 basic financial statements. This supplementary information is the responsibility of the System's management. Such additional information has been subjected to the auditing procedures applied by us in the audit of the 2006 basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the 2006 basic financial statements taken as a whole.

Ting P. in
Deloitte + Touche LLP

November 14, 2006

Management's Discussion & Analysis

This section presents management's discussion and analysis of the California Public Employees' Retirement System (CalPERS) financial performance during the fiscal year ended June 30, 2006, and is presented as a narrative overview and analysis in conjunction with the Chief Executive Officer's Letter of Transmittal included in the Introductory Section of the CalPERS Comprehensive Annual Financial Report. The Management's Discussion and Analysis should be read in conjunction with the basic financial statements of CalPERS, as presented in the Comprehensive Annual Financial Report.

In addition to the historical information, the Management's Discussion and Analysis includes certain forward-looking statements which involve certain risks and uncertainties. CalPERS actual results, performance, and achievements may differ materially from the results, performance, and achievements expressed or implied in such forward-looking statements, due to a wide range of factors, including changes in interest rates, changes in the securities markets, general economic conditions, and legislative changes, as well as other factors.

CalPERS is primarily responsible for administering retirement and health benefits, as well as administering supplemental retirement savings plans. CalPERS comprises a total of 15 funds, including five defined benefit pension funds, four defined contribution pension funds, four proprietary funds, and two agency funds. The Public Employees' Retirement Fund (PERF) is the primary fund administered by CalPERS.

Financial Highlights

Public Employees' Retirement Fund (PERF)

- The net assets of the PERF increased by \$21.6 billion, or 11.4 percent. The increase was primarily due to strong returns in real estate and private equity investments.
- The PERF net rate of return on investments of 11.8 percent on a market value basis was a decrease from the 12.3 percent rate of return in the prior fiscal year. Real estate and private equity produced exceptional returns for the year, and when combined with solid returns in equities, CalPERS investments achieved double-digit returns for the third year in a row.

The 11.8 percent net rate of return will not impact employer contribution rates until the 2007 fiscal year for the State and school employers and 2008 fiscal year for public agency employers.

- As of June 30, 2005, the date of the most recent actuarial valuation, the PERF is actuarially funded at 87.3 percent, which is the same as the June 30, 2004, funded level. The asset smoothing method only recognizes a portion of the total actuarial gains or losses. Additional actuarial losses from fiscal years when CalPERS had negative investment returns were recognized in the 2004-05 valuation resulting in a stable PERF funded ratio.
- The PERF paid \$9.2 billion in retirement benefits to 441,277 annuitants during 2006, compared to \$8.4 billion paid to 425,094 annuitants during the 2005 fiscal year. Benefit payments increased primarily due to an increase in the number of new retirees and cost-of-living adjustments (COLA).
- The total active and inactive membership was 1,048,895 at June 30, 2006. The PERF received \$3.1 billion in employee contributions from 807,589 active members and \$6.1 billion in employer contributions from 1,545 employers during fiscal year 2006, compared with \$3.2 billion and \$5.8 billion in employee and employer contributions respectively, in fiscal year 2005.

Additional financial information related to the other pension funds administered by CalPERS is included in the Financial Analysis Section of the Management's Discussion and Analysis.

Health & Long-Term Care Programs

- The CalPERS self-funded health care program earned \$12.1 million from operations, and unrestricted net assets increased by \$30.1 million to \$325.2 million. This increase can be attributed to a decrease in expected level of claims, moving Medicare-eligible members from the Basic plan to the Medicare plan, and savings from pharmacy initiatives.
- The unrestricted net assets of the CalPERS Long-Term Care Program amounted to a deficit of \$771.5 million at June 30, 2006. This amounts to an average deficit of \$4,436 for each of the 173,935 enrollees. The Long-Term Care Program collected \$243.7 million in premiums, and the approximate average annual

Management's Discussion & Analysis (continued)

premium per person was \$1,401. The deficit of \$771.5 million is an improvement of \$50.9 million from the deficit of \$822.4 million of June 30, 2005. The major source of the deficit reduction is the appreciation of investments, investment income of \$121.7 million, and a smaller increase in the estimated liability for future benefits. The LTCF is in the process of reviewing its current policies and exploring different options to address this deficit.

Critical Accounting Policies

CalPERS basic financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). CalPERS significant accounting policies are presented in Note 2 to the basic financial statements, which are included in this Comprehensive Annual Financial Report. CalPERS follows accounting policies to comply with various applicable laws and regulations and the guidelines as established by the Governmental Accounting Standards Board (GASB).

CalPERS most significant management accounting policies relate to the following.

Investments

All investments are reported at fair value. Many factors are considered in arriving at fair value. The fair value of investments in publicly held securities are generally based on actual market prices and quotations from major investment firms. In general, corporate bonds that do not have a published market price are valued based on yields currently available on comparable securities of issuers with similar credit ratings. The CalPERS Investment Office securities analysts or outside experts determine the criteria to identify comparable securities based on the size, industry, and profitability of the company offering the securities and the term, rate, and dollar amount of the security.

Mortgages are valued on the basis of the timing of future principal payments and the amount of interest payments discounted at prevailing interest rates for similar instruments. The prevailing interest rates for mortgages are generally based on the 30-year Treasury note rate, which can be found in financial publications. Market interest rate changes impact the likelihood of refinancing activity, which impacts the

value of the mortgage investments. Declining interest rates will cause the value of mortgage investments to increase, but at a slower rate than non-callable similar duration securities.

The fair value of real estate investments, principally rental property subject to long-term net leases, is estimated based on independent appraisals. The appraisals are performed by CalPERS-approved appraisers who meet specific professional qualifications. Appraisals are estimates of current value and are based on three methods: the income approach, the cost approach, and the comparative sales approach. The three approaches are then compared and the appraiser determines the most appropriate valuation for the property. The appraisal process involves a significant amount of judgment, and changes in the real estate marketplace are not immediately taken into consideration, as the appraisals are performed annually.

Short-term investments are reported at fair value, when available, or at cost plus accrued interest, when quoted market values are not available.

Alternative investments consist of investments in a variety of markets and industries through partnerships, co-investments, direct investments, and other investment vehicles. For these investments, and others where no readily ascertainable market value exists, management, in consultation with investment advisors, determined the fair values for the individual investments. Management takes into consideration factors such as the book value, based on audited financial statements, the current and projected income generated by the investment, and the cost of the investment. These estimates are, by their nature, subjective and based on judgment. Hedge funds are valued at fair value.

CalPERS, through outside investment managers, holds investments in futures and options and enters into forward foreign currency exchange contracts. The fair value of futures, options, and forward foreign currency exchange contracts are determined based upon quoted market values.

CalPERS could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contract. CalPERS investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring procedures. Investment performance rates of return for asset

Management's Discussion & Analysis (continued)

classes and total funds are prepared using pre-audit asset data by Wilshire Associates. The returns are based solely on Wilshire Associates' compilation and analysis of the data as provided by the master custodian, State Street Bank.

Actuarial Valuation

Actuarial valuations are used to determine the cost of pension benefits payable to the members of CalPERS who participate in the PERF, the Legislators' Retirement Fund (LRF), the Judges' Retirement Fund (JRF), the Judges' Retirement Fund II (JRF II), and the Volunteer Firefighters' Length of Service Award Fund (VFF), as well as the related required contribution rates. The actuarial valuations include a number of significant assumptions, including the actuarial valuation method used, the asset valuation method, the rate of return on the investment portfolio, rate of inflation, projected salary increases, post retirement benefits, and the life expectancy of members and beneficiaries. Significant actuarial assumptions used in the valuations are included in the Notes to Required Supplemental Schedules on page 62.

Estimated Liabilities

The Public Employees' Health Care Fund (HCF) establishes claim liabilities based on estimates of the ultimate costs of claims (including future claim adjustment expenses) that have been reported but not settled, and claims that have been incurred but not reported (IBNR). The estimated claims liability was calculated by the HCF's third-party administrator, using a variety of actuarial and statistical techniques, and adjusted for actual experience to produce current estimates that reflect recent settlements, claim frequency, and other economic and social factors. Adjustments to claims liabilities are charged or credited to an expense in the periods in which they are made. The estimated claims liability is carried at its face amount, and no interest discount is assumed. The IBNR portion represents an estimate for claims that have been incurred prior to the fiscal year end, but have not been reported to the HCF.

The Public Employees' Long-Term Care Fund (LTCF) estimates the required funding level to provide for the payment of future claim benefits. This estimate is predicated upon participation levels that are expected to be achieved by the program. The LTCF establishes the current

liability for future benefits based on the present value of such future benefits and expenses, less the present value of expected future premiums.

An actuarial valuation establishes the liability for future policy benefits based on the present value of future benefits and expenses less the present value of future premiums. The liability for future policy benefits was calculated by using a variety of actuarial and statistical techniques.

Overview of the Financial Statements

The Management's Discussion and Analysis provides an introduction to and overview of the CalPERS basic financial statements, which comprise the following components: fund financial statements, notes to the financial statements, required supplementary information, and other supplementary schedules. Collectively, this information presents the combined net assets held in trust for pension benefits and the combined unrestricted net assets for each of the other funds administered by CalPERS as of June 30, 2006, and summarizes the combined changes in net assets held in trust for pension benefits, the combined changes in unrestricted net assets, and the cash flows of the proprietary funds for the year then ended, along with an actuarial view on the funding status of the defined benefit plans. The information available in each of these sections is briefly summarized as follows.

Fund Financial Statements

At June 30, 2006, financial statements are presented for the two types of funds administered by CalPERS: fiduciary funds and proprietary funds.

Fiduciary funds — include pension trust funds. The defined benefit plans administered by CalPERS include the PERF, LRF, JRF, and JRF II. The defined contribution plans administered by CalPERS include the State Peace Officers' and Firefighters' Defined Contribution Plan Fund (SPOFF), the Public Agency Deferred Compensation Program (IRC 457), the Replacement Benefit Fund (RBF), and the Supplemental Contributions Program Fund (SCPF). The remaining fiduciary funds are the VFF, an award system, the Old Age & Survivors' Insurance Revolving Fund (OASI), and the Medicare Part D Special Deposit Fund (SDF). The fiduciary funds are used to account for

Management's Discussion & Analysis (continued)

resources held for the benefit of CalPERS participants. A statement of fiduciary net assets and a statement of changes in fiduciary net assets are presented for the fiduciary funds as of and for the year ended June 30, 2006, along with comparative total information as of and for the year ended June 30, 2005. These financial statements reflect the resources available to pay benefits to retirees and other beneficiaries as of year end, as well as the changes in those resources during the year.

Proprietary funds — include the following enterprise funds: the Public Employees' Health Care Fund (HCF), the Public Employees' Contingency Reserve Fund (CRF), the Public Employees' Long-Term Care Fund (LTCF), and the Public Employees' Deferred Compensation Fund (DCF). Proprietary funds are used to account for CalPERS business-type activities, where fees are charged to cover the costs of certain services, including long-term care, health care, and other benefits. A statement of net assets, a statement of revenues, expenses, and changes in fund net assets, and a statement of cash flows are presented for the proprietary funds as of June 30, 2006, and for the year then ended, along with comparative total information as of and for the year ended June 30, 2005. These financial statements reflect the net assets of, changes in net assets of, and cash flows from CalPERS business-type activities.

Notes to the Basic Financial Statements

The financial statement notes provide additional information that is essential to a full understanding of the information provided in the fund financial statements. Information available in the notes to the financial statements is described below.

Note 1 — provides a general description of CalPERS, as well as a concise description of each of the funds administered by CalPERS. Information regarding employer and member participation in the pension plans administered by CalPERS is also provided.

Note 2 — provides a summary of significant accounting policies, including the basis of accounting for each of the fund types, investment accounting policies, management's use of estimates, information regarding the implementation of new accounting pronouncements, and other significant accounting policies.

Note 3 — provides information on cash and cash equivalents.

Note 4 — describes investments, including investing authority, investment risk categorizations, and additional information about cash, securities lending, and derivatives.

Note 5 — provides information about employer contributions to the pension funds administered by CalPERS.

Note 6 — provides information on commitments.

Note 7 — provides information on potential contingencies of CalPERS.

Note 8 — provides detailed information on the estimated claims liability of the HCF.

Note 9 — provides information regarding the LTCF June 30, 2006 actuarial valuation.

Required Supplementary Information

Because of the long-term nature of a public defined benefit pension plan, financial statements for the past year alone cannot provide sufficient information to properly reflect the funded position of the plan. Therefore, in addition to the basic financial statements, two required schedules of historical trend information related to the defined benefit plans are presented as part of the Required Supplementary Information (RSI) section of the basic financial statements. These two schedules are the Required Supplemental Schedule of Funding Progress and the Required Supplemental Schedule of Employer Contributions. These two schedules are based on the actuarial valuations performed by CalPERS actuaries, and provide additional actuarial information that contributes to the understanding of the changes in the actuarial funding and the funded status of these defined benefit plans over the past 10 years. The actuarial information is based upon assumptions made about future events at the time the valuations were performed, and, therefore, the amounts presented are management's estimates. Also included as part of the RSI is the Required Supplemental Schedule of Claims Development Information for the HCF.

Other Supplementary Schedules

Other schedules include detailed information on administrative expenses incurred by CalPERS-administered funds, as well as investment and other professional services expenses incurred.

Financial Analysis of CalPERS Funds

Public Employees’ Retirement Fund (PERF)

Plan Net Assets

The PERF provides retirement benefits to State of California and other California public agency employees. PERF benefits are funded by member and employer contributions and by earnings on investments. The PERF net assets held in trust for benefits at June 30, 2006 were \$211.2 billion, an increase of \$21.6 billion (11.4 percent) from \$189.6 billion at June 30, 2005.

Additions to PERF net assets held in trust for benefits include employer and member contributions, as well as investment income. For the 2006 fiscal year, employer and member contributions totaled \$9.2 billion, an increase of \$0.2 billion (2.5 percent) from the 2005 fiscal year. The increase in required contributions was due primarily to an increase in participants. The PERF recognized net investment income of \$22.0 billion for the 2006 fiscal year, compared with a net investment income of \$21.9 billion for the 2005 fiscal year.

Deductions from PERF net assets held in trust for benefits consist primarily of retirement, death, and survivor benefits, refunds, and administrative expenses. For the 2006 fiscal year, retirement, death, and survivor benefits totaled \$9.2 billion, an increase of \$0.8 billion (9.5 percent) from the 2005 fiscal year. The increase in benefit payments was primarily a result of an increase in the number of retirees from 425,094 to 441,277 and COLA increases. For the 2006 fiscal year, the costs of administering the PERF benefits amounted to \$236.2 million, an increase of approximately \$27.2 million (13.0 percent) from the 2005 fiscal year due to the resumption of information technology projects and increased operating costs.

On a per member and beneficiary basis, the cost of administering PERF benefits during the 2006 fiscal year was approximately \$159 per individual, an increase of approximately \$14 per individual from the 2005 fiscal year.

An actuarial valuation of PERF assets and benefit obligations is performed annually. At June 30, 2005, the date of the most recent actuarial valuation, the funded status of the PERF remained unchanged at 87.3 percent from the funded status at June 30, 2004. The amount by which PERF actuarial benefit liabilities exceeded actuarial assets was \$26.6 billion at June 30, 2005, compared with a \$24.7 billion funding deficit at June 30, 2004. This increase relates primarily to the recognition of actuarial losses from prior fiscal years when the PERF incurred negative investment returns.

Management's Discussion & Analysis (continued)

Current year earnings will affect future years' funded status and contribution rates using the CalPERS policy of actuarial asset smoothing.

Investments

PERF investments, excluding securities lending collateral, totaled \$212.1 billion at June 30, 2006, which was \$18.3 billion (9.4 percent) more than the \$193.8 billion in total PERF investments at June 30, 2005.

At June 30, 2006, the PERF held \$129.9 billion in domestic equity and international equity securities, an increase of \$15.1 billion from \$114.8 billion at fiscal year end 2005. The increase was mainly due to above average returns in international equity securities during 2006. Domestic equity and international equity securities earned returns of approximately 9.6 percent and 26.7 percent, respectively, for the 2006 fiscal year, compared to 7.3 percent and 17.5 percent, respectively for fiscal year 2005.

CalPERS benchmark returns for domestic and international equity securities for fiscal year 2006 were 9.5 percent and 27.7 percent, respectively. CalPERS uses the Wilshire 2500 Index to provide a benchmark for the domestic equity investment returns, and the PERS SSGA Custom Index for international equity investment returns. These benchmarks are representative of the returns that could be expected in a similar investing environment, and reflect the overall market conditions.

At June 30, 2006, the PERF held \$52.0 billion in domestic and international debt securities, a decrease of \$2.3 billion from \$54.3 billion at fiscal year end 2005. Domestic debt securities returned approximately a negative 1.3 percent, and international debt securities returned approximately a negative 0.2 percent for the 2006 fiscal year, compared to the 11.0 percent and 8.4 percent, respectively for fiscal year 2005. CalPERS benchmark returns were negative 3.1 percent and 0.2 percent, respectively. CalPERS uses the Lehman Long Liability Index and the Lehman World Government Bonds, Ex-U.S. Index to provide a benchmark for fixed income investment returns. These benchmarks are representative of the returns that could be expected in a similar investing environment.

At June 30, 2006, the PERF held \$15.2 billion in net real estate investments, an increase of \$5.6 billion from \$9.6 billion at the 2005 fiscal year end. CalPERS has continued to increase its real estate holdings in opportunistic and international investments to fulfill investment diversification. Real estate investments returned approximately 25.8 percent for the 2006 fiscal year, compared to 30.2 percent for fiscal year 2005.

CalPERS benchmark real estate return for fiscal year 2006 was 18.7 percent. CalPERS uses the NCREIF Property Index to provide a benchmark for our real estate investment returns.

At June 30, 2006, the PERF held \$12.1 billion in alternative investments, an increase of \$2.3 billion from \$9.8 billion at the 2005 fiscal year end. Alternative

Management's Discussion & Analysis (continued)

Investment Returns — PERF

investments yielded a return of approximately 19.8 percent for the 2006 fiscal year, compared to 23.1 percent for fiscal year 2005.

CalPERS benchmark alternative investment return for fiscal year 2006 was 19.6 percent. CalPERS uses the Venture Economics Custom Young Fund Universe to provide a benchmark for alternative investments.

At June 30, 2006, the PERF held \$2.9 billion in short-term investments, a decrease of \$2.4 billion from the \$5.3 billion at the 2005 fiscal year end. Short-term investments returned approximately 4.4 percent for the 2006 fiscal year, compared to 2.2 percent for fiscal year 2005. CalPERS uses the SSGA Custom STIF as a benchmark for short-term investments.

The PERF earned other investment income of \$766.0 million for the 2006 fiscal year. Included in other investment income was income earned from securities litigation, sale of fractional shares, and other miscellaneous income, and \$523.7 million resulting from a redistribution of income from the change in the net asset value of our real estate investments.

The PERF earns additional investment income by lending investment securities. The borrowers provide collateral to

Investment Portfolio — PERF at Market Value (Dollars in Billions)

Note:

Excludes \$38.0 billion in securities lending collateral.

the PERF that are valued in excess of the securities loaned. For the 2006 fiscal year, net securities lending income amounted to \$158.5 million, an increase of \$43.7 million (38.1 percent) from \$114.8 million during fiscal year 2005.

CalPERS participates in Directed Brokerage/Commission Recapture arrangements. The CalPERS Directed Brokerage Program had a balance of \$2.4 million at July 1, 2005. For fiscal year 2006, brokerage commissions that were rebated totaled \$2.4 million. Expenses in the amount of \$3.4 million were incurred to purchase analytical tools, advisory, and other research materials. The Directed Brokerage Program had a balance of approximately \$1.5 million at June 30, 2006. These amounts are recorded in the accompanying financial statements as of June 30, 2006 and 2005.

CalPERS participates in asset-based lending, in which secured debt is loaned to non-investment grade borrowers, primarily for working capital, acquisitions, turnarounds, growth financing, debtor-in-possession financing, exit financing, and corporate recapitalization/reorganizations. In exchange for these loan amounts, CalPERS receives interest and fees from the borrowers. Interest and fee income earned was \$9.7 million for the 2006 fiscal year, and outstanding commitments totaled \$442.5 million at June 30, 2006.

Management's Discussion & Analysis (continued)

Other Defined Benefit Pension Plans

Legislators' Retirement Fund (LRF)

Plan Net Assets

The LRF provides retirement benefits to California Legislators elected to office before November 7, 1990, and to all Constitutional and Statutory Officers. The number of LRF members is declining as eligible incumbent Legislators leave office and are replaced by those ineligible to participate in the LRF.

The LRF net assets held in trust for benefits at June 30, 2006 totaled \$133.6 million, a decrease of \$4.5 million (3.2 percent) from June 30, 2005.

Additions to LRF net assets held in trust for benefits were from investment income and contributions to repurchase military and prior year service credit. There were no actuarially determined annual required employer and member contributions for 2006. Net investment income decreased \$8.8 million (69.8 percent) to a net investment gain of \$3.8 million for the 2006 fiscal year, from a net investment gain of \$12.6 million for the 2005 fiscal year, due primarily to a decline in domestic fixed income returns during 2006.

Deductions in LRF net assets held in trust for benefits are primarily composed of retirement, death, and survivor benefits. For the 2006 fiscal year, these benefits decreased \$0.5 million (6.1 percent) to \$7.3 million from \$7.8 million in 2005. On a per member and beneficiary basis, the cost of administering LRF benefits during the

2006 fiscal year was approximately \$939 per individual, a decrease of approximately \$77 per individual from the 2005 fiscal year due to decreased direct expenses.

An actuarial valuation of LRF assets and benefit obligations is performed annually using the aggregate cost method, which does not identify unfunded actuarial liabilities. Based on the most recent actuarial valuation, performed as of June 30, 2005, the active member contribution rate for the 2007 fiscal year remains at zero percent.

Investments

The LRF invests mainly in domestic and international equity securities, as well as domestic debt securities. LRF investments totaled \$133.6 million at June 30, 2006, which was \$4.5 million (3.3 percent) less than the \$138.1 million in total LRF investments at June 30, 2005, primarily as a result of less than expected investment returns and a zero contribution rate.

At June 30, 2006, the LRF held \$54.2 million in domestic equity and international equity securities, an increase of \$0.7 million from \$53.5 million at fiscal year end 2005. Domestic equity and international equity securities yielded returns of approximately 8.4 percent and 26.7 percent for fiscal year 2006 respectively, compared to the 6.0 percent and 14.1 percent for fiscal year 2005. CalPERS benchmark returns for the fiscal year 2006 were 8.5 percent and 26.6 percent. CalPERS uses the Custom S&P 500 Index and MSCI EAFE Index (net of dividends), to provide a benchmark for the domestic and international equity investment returns, respectively. These benchmarks are representative of the returns that could be expected in a

similar investing environment and reflect the overall market conditions.

At June 30, 2006, the LRF held \$79.4 million in domestic debt securities, a decrease of \$5.2 million from \$84.6 million at fiscal year end 2005. Domestic debt securities returned negative 5.3 percent for fiscal year 2006, compared to 8.6 percent for fiscal year 2005. CalPERS benchmark return for fiscal year 2006 was negative 3.4 percent. CalPERS uses the Citigroup Large Pension Fund Index to provide a benchmark for our fixed income investment returns. This benchmark is

representative of the returns that could be expected in a similar investing environment, and reflects the overall market characteristics.

Judges' Retirement Fund (JRF)

Plan Net Assets

The JRF provides retirement benefits to California Supreme and Appellate Court Justices and Superior Court Judges. The JRF net assets held in trust for benefits at June 30, 2006, totaled \$17.9 million, an increase of \$0.7 million from June 30, 2005.

Management's Discussion & Analysis (continued)

Additions to JRF net assets held in trust for benefits include employer, State of California, and member contributions, as well as investment income. For the 2006 fiscal year, employer, State, and member contributions decreased \$6.6 million (4.8 percent) to \$130.9 million, from \$137.5 million for the 2005 fiscal year, primarily as a result of an decrease in the State's contribution. For the 2006 fiscal year, net investment income increased \$0.7 million (309.8 percent) from the 2005 fiscal year due mainly to higher average asset balances throughout the year.

Deductions in JRF net assets held in trust for benefits are primarily composed of retirement, death, and survivor benefits. For the 2006 fiscal year, these benefits amounted to \$133.6 million, an increase of \$7.0 million (5.5 percent) from the 2005 fiscal year. The increase in benefit payments was mainly a result of a COLA and an increase in the number of JRF retirees and beneficiaries to 1,660 in the 2006 fiscal year from 1,606 in the 2005 fiscal year.

On a per member and beneficiary basis, the cost of administering JRF benefits during 2006 was approximately \$69 per individual, a decrease of approximately \$352 per individual from fiscal year 2005. The decrease is due primarily to a reallocation of expenses in the 2006 fiscal year.

The JRF is funded on a "pay-as-you-go" basis, where short-term investments, contributions received during the year, and a State General Fund augmentation are used to provide funding for benefit payments. This funding method is generally more expensive in the long term, as the fund does not have investment returns generated by a funded plan. Without the State General Fund augmentation, the

JRF will not be able to pay the accumulated benefit payments due in 2007.

Investments

The JRF invests only in short-term securities. Total JRF investments were \$15.0 million at June 30, 2006, which was \$9.8 million more than the \$5.2 million in total JRF investments at June 30, 2005. The increase in total JRF investments was primarily due to an increase in total contributions. Short-term investments returned approximately 4.4 percent for fiscal year 2006, compared with the 2.4 percent for fiscal year 2005.

Judges' Retirement Fund II (JRF II)

Plan Net Assets

The JRF II provides retirement benefits to California Supreme and Appellate Court Justices, Superior Court Judges, and Municipal Court Judges first appointed or elected after November 9, 1994. The JRF II net assets held in trust for benefits at June 30, 2006 were \$219.0 million, an increase of \$47.1 million (27.4 percent) from June 30, 2005.

Additions to JRF II net assets held in trust for benefits include employer and member contributions, as well as investment income. Employer and member contributions increased \$4.2 million (14.4 percent), to \$33.7 million for the 2006 fiscal year, from \$29.4 million for the 2005 fiscal year, primarily as a result of an 11.5 percent increase in membership from 2005 to 2006. For the 2006 fiscal year, the JRF II earned net investment income of \$15.5 million, an increase in income of approximately \$0.7 million (4.4 percent) from the 2005 fiscal year net investment

Investments — JRF II

Management's Discussion & Analysis (continued)

income of \$14.8 million, primarily due to increased dividends from equity investments as well as from stable earnings from fixed income investments.

Deductions in JRF II net assets held in trust for benefits are primarily composed of retirement, death, and survivor benefits. For the 2006 fiscal year, these benefits amounted to \$859,000, a decrease of \$45,000 (5.0 percent) from the 2005 fiscal year.

On a per member and beneficiary basis, the cost of administering JRF II benefits during fiscal year 2006 was approximately \$481 per individual, a decrease of approximately \$80 per individual from fiscal year 2005, due to increased membership and lower direct costs.

An actuarial valuation of the JRF II assets and benefit obligations is performed annually. At June 30, 2005, the date of the most recent actuarial valuation, the funded status of JRF II increased to 94.3 percent from 93.8 percent at June 30, 2004. At June 30, 2005, the JRF II actuarial benefit obligations exceeded its actuarial assets by approximately \$10.2 million, while the amount by which the JRF II actuarial benefit obligations exceeded its actuarial assets at June 30, 2004, was approximately \$8.6 million.

Investments

The JRF II invests mainly in domestic and international equity securities and domestic debt securities. Total JRF II investments amounted to \$215.8 million (see table on previous page) at June 30, 2006, which was \$43.5 million (25.4 percent) more than the \$172.1 million at June 30, 2005. The increase in total JRF II investments was primarily due to the increase in contributions and membership and positive investment returns during the 2006 fiscal year.

At June 30, 2006, the JRF II held \$116.1 million in domestic equity and international equity securities, an increase of \$29.0 million from \$87.1 million at fiscal year end 2005. Domestic equity and international equity securities yielded returns of approximately 8.4 percent and 26.8 percent for fiscal year 2006, compared to the 6.0 percent and 14.0 percent for fiscal year 2005. CalPERS benchmark returns for fiscal year 2006 were 8.5 percent and 26.6 percent, respectively. CalPERS uses the Custom

S&P 500 Index and MSCI EAFE Index to provide a benchmark for our domestic and international equity investment returns. These benchmarks are representative of the returns that could be expected in a similar investing environment, and reflect the overall market characteristics.

At June 30, 2006, the JRF II held \$73.0 million in domestic debt securities, an increase of \$11.5 million from \$61.5 million at fiscal year end 2005. Domestic debt securities returned approximately negative 6.0 percent for the 2006 fiscal year, compared to 8.8 percent for fiscal year 2005. CalPERS benchmark return for fiscal year 2006 was negative 3.4 percent. CalPERS uses the Citigroup Large Pension Fund Index to provide a benchmark for our fixed income investment returns. This benchmark is representative of the returns that could be expected in a similar investing environment.

At June 30, 2006, the JRF II held \$6.1 million in short-term investments, a decrease of \$0.8 million from \$6.9 million at fiscal year end 2005. Short-term investments returned approximately 4.5 percent for fiscal year 2006, compared to 2.4 percent for fiscal year 2005.

Volunteer Firefighters' Fund (VFF)

Plan Net Assets

The VFF provides monetary awards to volunteer firefighters. The VFF net assets held in trust for benefits at June 30, 2006 were \$3.4 million, an increase of approximately \$0.3 million (12.6 percent), from \$3.1 million at June 30, 2005.

Contribution revenues totaled \$307,000 for the 2006 fiscal year, an increase of 45.5 percent from the 2005 fiscal year, due primarily to an increase in volunteer firefighter members and lump sum purchases of prior service credits. Net investment income was \$285,000 for fiscal year 2006, an increase in investment income of 18.3 percent from the \$241,000 in net investment income for fiscal year 2005.

Deductions from VFF net assets held in trust include awards of \$103,000 for fiscal year 2006, an increase of 25.6 percent from the 2005 fiscal year, primarily due to more participants qualifying and taking awards earlier.

Management's Discussion & Analysis (continued)

On a per member and beneficiary basis, the cost of administering the VFF benefits during fiscal year 2006 were approximately \$27 per individual, a decrease of approximately \$1 per individual from fiscal year 2005. The decrease was due to lower direct expenses.

An actuarial valuation of the VFF assets and benefit obligations is performed annually. At June 30, 2005, the date of the most recent actuarial valuation, the funded status of the VFF increased to 88.0 percent from 84.4 percent at June 30, 2004. At June 30, 2005, the VFF actuarial benefit obligations exceeded its actuarial assets by \$439,000, compared to \$550,000 at June 30, 2004.

Investments

The VFF invests mainly in domestic equity securities, international equity securities, domestic debt securities, and real estate equities. Total VFF investments were \$3.0 million at June 30, 2006, which was \$1.9 million (38.8 percent) less than the \$4.9 million at June 30, 2005.

At June 30, 2006, the VFF held \$1.7 million in domestic equity and international equity securities, an increase of \$0.3 million from the \$1.4 million at fiscal year end 2005. Domestic equity securities experienced a return of approximately 9.5 percent for fiscal year 2006, compared to the 6.7 percent for fiscal year 2005. International equity experienced a return of approximately 26.7 percent for fiscal year 2006. The VFF did not hold international equity securities long enough in the 2005 fiscal year for an annual rate of return calculation. CalPERS benchmark return for fiscal year 2006 was 9.6 percent for domestic equity

securities and 26.6 percent for international equity securities. CalPERS uses the Russell 3000 Index to provide a benchmark for our domestic equity investment returns, and the MSCI EAFE Index for our international equity investment returns. This benchmark is representative of the returns that could be expected in a similar investing environment, and reflects the overall market characteristics.

At June 30, 2006, the VFF held \$1.1 million in domestic debt securities, an increase of \$0.1 million from \$1.0 million at fiscal year end 2005. Domestic debt securities returned approximately negative 1.6 percent for the 2006 fiscal year, compared to the 10.1 percent for fiscal year 2005. CalPERS benchmark return for fiscal year 2005 was negative 3.4 percent. CalPERS uses the Citigroup Large Pension Fund Index to provide a benchmark for our fixed income investment returns. This benchmark is representative of the returns that could be expected in a similar investing environment.

Defined Contribution Pension Plans

State Peace Officers' & Firefighters' Defined Contribution Plan Fund (SPOFF)

Plan Net Assets

The SPOFF provides supplemental retirement benefits to eligible safety employees. Net assets held in trust for pension benefits increased by \$18.9 million (7.9 percent) to \$259.5 million at June 30, 2006, from \$240.6 million at June 30, 2005.

Contribution revenues were \$8.9 million for fiscal year 2006, a decrease of 78.4 percent from fiscal year 2005.

Real Estate	0.3	10.0	21.5	25.3	22.0
Total or Overall Return	\$3.0	100.0%	10.3%	10.2%	10.2%

Management's Discussion & Analysis (continued)

The large decrease to contribution revenues in fiscal year 2006 was due to negotiation provisions in the bargaining unit contract. The State suspended remitting monthly contributions for the rank and file and only continued contributions for management/supervisors. Net investment income was \$16.5 million for fiscal year 2006, representing an increase in investment income of \$1.2 million from the \$15.3 million in net investment income for the 2005 fiscal year.

SPOFF benefit expenses were \$6.6 million for the 2006 fiscal year, an increase of \$1.2 million (22.9 percent) from the 2005 fiscal year, due primarily to the increase in the number of retired SPOFF participants in 2006.

Investments

The SPOFF invests mainly in domestic equity securities. Total SPOFF investments were \$258.8 million at June 30, 2006, which was \$21.6 million (9.1 percent) more than the \$237.2 million in total SPOFF investments at June 30, 2005. Domestic equity securities yielded returns of approximately 6.9 percent for fiscal year 2006, compared to 8.0 percent for fiscal year 2005. CalPERS benchmark return for fiscal year 2006 was 7.0 percent. CalPERS uses a composite index to provide a benchmark for our domestic equity investment return.

Management's Discussion & Analysis (continued)

Public Agency Deferred Compensation Plan (IRC 457)

Plan Net Assets

The CalPERS Board is trustee for public agency participant assets in the IRC 457 deferred compensation program. Net assets held in trust for pension benefits at June 30, 2006, were \$540.1 million, an increase of \$97.3 million (22.0 percent), from \$442.8 million at June 30, 2005.

Additions to IRC 457 net assets consist of member contributions of \$123.2 million in fiscal year 2006, compared to \$97.5 million in 2005. The increase is primarily due to an increase in member participation from 19,455 at June 30, 2005 to 21,542 at June 30, 2006. Net investment income amounted to \$36.2 million for fiscal year 2006, representing an increase in investment income of \$20.5 million from the \$15.7 million in net investment income for fiscal year 2005.

Deductions from the IRC 457 net assets consist primarily of participant withdrawals of \$62.1 million, an increase of \$20.6 million from the prior fiscal year of \$41.5 million.

Investments

The IRC 457 investments were \$538.6 million at June 30, 2006, which was \$97.3 million more than the \$442.8 million in total IRC 457 investments at June 30, 2005. IRC 457 asset allocation is participant directed.

At June 30, 2006, the IRC 457 held \$398.1 million in domestic and international equity securities, an increase of \$85.2 million from \$312.9 million at fiscal year end 2005.

At June 30, 2006, the IRC 457 held \$97.4 million in domestic debt securities, an increase of \$10.9 million from \$86.5 million at fiscal year end 2005.

At June 30, 2006, the IRC 457 held \$43.1 million in short-term investments, an increase of \$0.5 million from \$42.6 million at fiscal year end 2005.

Replacement Benefit Fund (RBF)

The RBF provides replacement retirement benefits to the small percentage of retired PERF members whose CalPERS retirement benefits earned are limited by Internal Revenue Code Section 415(b). Net assets held in trust for pension benefits increased by \$36,000 to \$109,000 at June 30, 2006, from \$73,000 at June 30, 2005.

Contribution revenues were \$1.5 million for the 2006 fiscal year, an increase of \$0.4 million from the 2005 fiscal year, primarily due to an increase in the number of retirees to 91 at June 30, 2006, from 70 at June 30, 2005.

The RBF paid benefits of \$1.5 million for the 2006 fiscal year, an increase of \$0.4 million from fiscal year 2005, primarily due to more members being eligible.

Investments

The RBF invests only in short-term securities. Total RBF investments were \$881,000 at June 30, 2006, which was \$205,000 more than the \$676,000 in total RBF investments at June 30, 2005. Short-term investments returned approximately 4.5 percent for fiscal year 2006, compared to 2.9 percent for fiscal year 2005.

Management's Discussion & Analysis (continued)

Supplemental Contributions Program Fund (SCPF)

The SCPF was established effective January 1, 2000, to provide supplemental retirement benefits to members of CalPERS and is entirely member funded. Net assets held in trust for pension benefits increased slightly to \$20.8 million at June 30, 2006.

Contribution revenues were \$634,000 for the 2006 fiscal year, an increase of 14.9 percent from the 2005 fiscal year, primarily due to more lump sum contributions being made in the 2006 fiscal year than in the 2005 fiscal year. Net investment income was \$1.8 million for fiscal year 2006, representing a decrease in investment income of \$0.1 million from \$1.9 million in net investment income for fiscal year 2005.

For fiscal year 2006, participant withdrawals were \$2.1 million, a decrease of \$0.1 million (5.3 percent) from fiscal year 2005.

Investments

The SCPF investments were \$20.8 million at June 30, 2006, which was \$0.2 million more than the \$20.6 million in total SCPF investments at June 30, 2005.

At June 30, 2006, the SCPF held \$15.0 million in domestic equity and international equity securities, an increase of \$0.7 million from \$14.3 million at fiscal year end 2005. Domestic equity and international equity securities yielded returns of approximately 8.6 percent and 26.5 percent for fiscal year 2006, compared to the 6.0 percent and 13.8 percent for fiscal year 2005. CalPERS benchmark returns for fiscal year 2006 were 8.4 percent and 26.6 percent, respectively. CalPERS uses the Custom S&P 500 Index and MSCI EAFE Index to provide a benchmark for our domestic and international equity investment returns, respectively.

At June 30, 2006, the SCPF held \$5.5 million in domestic debt securities, a decrease of \$0.3 million from \$5.8 million at fiscal year end 2005. Domestic debt securities returned approximately negative 3.1 percent for fiscal year 2006, compared to 13.8 percent for fiscal year 2005. CalPERS benchmark return for fiscal year 2006 was negative 0.2 percent. CalPERS uses the Citigroup 1-10 Year

Treasury as a benchmark for its domestic debt security investment returns.

At June 30, 2006, the SCPF held \$317,000 in short-term investments, a decrease of \$175,000 from \$492,000 at fiscal year end 2005. Short-term investments returned approximately 3.1 percent for fiscal year 2006, which was an improvement over the 1.6 percent for fiscal year 2005.

Enterprise Funds

Employees' Health Care Fund (HCF)

Plan Activity

The HCF accounts for the activities of the CalPERS self-insured health care programs.

The self-insured health care programs incurred claims expenses of \$1.1 billion for the 2006 fiscal year, an increase of 13.2 percent from the 2005 fiscal year, primarily due to increases in provider pricing and increased benefit utilization. Premium revenues were \$1.2 billion for the 2006 fiscal year, an increase of 9.6 percent from the 2005 fiscal year, primarily as a result of premium rate increases and enrollment growth. Net investment income was \$18.0 million for the 2006 fiscal year, an increase of 79.6 percent from the 2005 fiscal year. As a result of increased interest rates and the above, unrestricted net assets increased by \$30.1 million (10.2 percent) to \$325.2 million at June 30, 2006.

Investments

Investments of the HCF at June 30, 2006 and 2005, include highly-liquid, short-term securities and domestic debt securities. Investments increased \$12.1 million from \$426.5 million at June 30, 2005, to \$438.6 million at June 30, 2006. The increase was due primarily to the increased short-term interest rates.

Public Employees' Contingency Reserve Fund (CRF)

The CRF was established to fund administrative costs related to the CalPERS health care programs and to provide a contingency reserve for potential increases in future health care premium rates or health care benefit costs. The CRF also accounts for public agency health payments and

Management's Discussion & Analysis (continued)

remittances to contracted health care providers. Administrative fees earned by the CRF were \$13.1 million for the 2006 fiscal year, a decrease of 22.0 percent from 2005 fiscal year of \$16.8 million. The decrease was due mainly to a premium rate decrease during the 2006 fiscal year. Net investment income was \$5.0 million for the 2006 fiscal year, an increase of 79.2 percent from the 2005 fiscal year. Unrestricted net assets increased by \$1.8 million (23.4 percent) to \$9.7 million at June 30, 2006.

Public agencies remitted \$1.6 billion for payments to contracted health care providers in fiscal year 2006. This is a 7.4 percent increase of \$0.1 billion over 2005.

Investments

Investments of the CRF at June 30, 2006 and 2005, included only highly-liquid, short-term securities, as investment balances are used to fund operating cash flows. Investments increased \$9.1 million from \$154.4 million at June 30, 2005 to \$163.5 million at June 30, 2006.

Public Employees' Long-Term Care Fund (LTCF)

The LTCF, which provides long-term care insurance to participating members, incurred claims expenses of \$78.0 million for the 2006 fiscal year, an increase of 19.3 percent from the 2005 fiscal year, due mainly to an increase in benefit utilization. Premium revenues were \$243.7 million for the 2006 fiscal year, an increase of 0.8 percent from the 2005 fiscal year. Net investment income amounted to \$121.7 million for the 2006 fiscal year, a decrease in investment income of 2.2 percent from the \$124.5 million in net investment income for the 2005 fiscal year, due mainly to lower appreciation in investments

in 2006. The unrestricted net assets of the CalPERS Long-Term Care Program increased by \$50.9 million to negative \$771.5 million during the 2006 fiscal year as a result of investment earnings and a smaller increase in the estimated liability for future policy benefits. Earnings were offset by an increase in liabilities due to the significant growth of inflation-adjusted policies. The LTCF is in the process of reviewing its current policies and exploring different options to address the deficit.

Investments

Total LTCF investments were \$1.8 billion at June 30, 2006, which was \$0.2 billion more than the \$1.6 billion in total LTCF investments at June 30, 2005.

At June 30, 2006, the LTCF held \$870.7 million in domestic equity and international equity securities, a decrease of \$69.0 million from \$939.7 million at fiscal year end 2005. Domestic equity and international equity securities experienced returns of approximately 8.5 percent and 26.8 percent for the 2006 fiscal year, compared to the 6.0 percent and 13.8 percent for fiscal year 2005. CalPERS benchmark returns for fiscal year 2006 were 8.5 percent and 26.6 percent. CalPERS uses the Custom S&P 500 Index and MSCI EAFE Index to provide a benchmark for our domestic and international equity investment returns. These benchmarks are representative of the returns that could be expected in a similar investing environment, and reflect the overall market environment.

At June 30, 2006, the LTCF held \$825.4 million in domestic debt securities, an increase of \$248.1 million from \$577.3 million at fiscal year end 2005. Domestic debt securities returned approximately a negative 4.8 percent,

compared to 8.5 percent for fiscal year 2005. CalPERS benchmark return for fiscal year 2006 was a negative 3.4 percent. CalPERS uses the Citigroup Large Pension Fund Index to provide a benchmark for our fixed income investment returns. This benchmark is representative of the returns that could be expected in a similar investing environment, and reflects the overall market environment.

Public Employees' Retirement System Deferred Compensation Fund (DCF)

The purpose of the DCF is to maintain the financial records associated with the investment and administrative management services CalPERS offers to other governments defined contribution plans. The fund recognizes as revenue fees charged other government clients for these services. The fund also records as expenses the costs incurred by CalPERS staff to support these services. Net income is retained in the fund balance to further expand the amount and types of deferred compensation plan management services. Fees are assessed to the State Savings Plus Program to manage one plan option, and certain investment portfolios of the IRC 457 public agency program.

The DCF reported administrative and investment management revenues of \$1.7 million for the 2006 fiscal year, relatively unchanged from the 2005 fiscal year. Expenses necessary to support these services were \$1.3 million for the 2006 fiscal year, which was a 10.1 percent increase from the 2005 fiscal year. Net income in fiscal year 2006 from investment of the DCF fund balance was \$139,000, an increase of 172.5 percent from the 2005 fiscal year, due mainly to more fees earned. Unrestricted net assets increased by \$0.5 million (58.2 percent) to \$1.5 million at June 30, 2006.

Investments

Investments of the DCF at June 30, 2006 and 2005, included only highly-liquid, short-term securities. Investments increased \$3.2 million from \$1.5 million at June 30, 2005, to \$4.7 million at June 30, 2006.

Requests For Information

This Financial Report is designed to provide a general overview of CalPERS finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the CalPERS Fiscal Services Division, P.O. Box 942703, Sacramento, CA, 94229-2703, or by calling 888 CalPERS (or 888-225-7377).

Notes to the Basic Financial Statements

1. General Description of the Plan

General

The State Employees' Retirement System, the predecessor to the Public Employees' Retirement System of the State of California (CalPERS), or the "System," was created after voters approved a constitutional amendment authorizing legislation to establish a pension system for State employees. Such legislation became effective January 1, 1932. CalPERS has expanded to include, among others, employees of local agencies which elect to participate in the System. The Board of Administration (Board) of CalPERS administers a total of 15 funds, including five defined benefit retirement plans: the Public Employees' Retirement Fund (PERF), the Legislators' Retirement Fund (LRF), the Judges' Retirement Fund (JRF), the Judges' Retirement Fund II (JRF II), and the Volunteer Firefighters' Length of Service Award Fund (VFF); four defined contribution retirement plans: the State Peace Officers' and Firefighters' Defined Contribution Plan Fund (SPOFF), the Public Agency Deferred Compensation Program (IRC 457), the Replacement Benefit Fund (RBF), and the Supplemental Contributions Program Fund (SCPF); two health care plans: the Public Employees' Health Care Fund (HCF) and the Public Employees' Contingency Reserve Fund (CRF); and four other plans: the Public Employees' Long-Term Care Fund (LTCF), the Public Employees' Deferred Compensation Fund (DCF), the Old Age & Survivors' Insurance Revolving Fund (OASI), and the Special Deposit Fund (SDF).

Reporting Entity

The basic financial statements of CalPERS include fund financial statements reporting the financial activities of all of the above funds and assets under trust. The CalPERS Board of Administration has plenary authority and fiduciary responsibility for the investment of monies and the administration of the System pursuant to the State Constitution, Article XVI, Section 17. CalPERS is a unit of the State of California State and Consumer Services Agency; however, CalPERS is not subject to administrative direction by any department, commission, board, bureau, or agency of the State. As such, CalPERS is classified as a component unit of the State of California for financial reporting purposes, in accordance with the provisions of Governmental Accounting Standards Board Statement No. 39.

CalPERS financial statements are included in fiduciary and proprietary funds in the State of California Comprehensive Annual Financial Report.

Defined Benefit Pension Plans

The PERF, LRF, JRF, and JRF II are defined benefit pension plans which provide benefits based on members' years of service, age, final compensation, and benefit formula. In addition, benefits are provided for disability, death, and survivors of eligible members or beneficiaries. California Government Code Section 50951 created the VFF as an award system that provides benefits based on members' years of service and age. VFF enrollment, receipt of an award, and service credit shall not be construed as a retirement, retirement allowance or benefit, or as retirement system service credit, respectively. However, for financial statement purposes, the VFF is included as part of the pension trust funds.

The State of California and 1,544 public agencies and schools (representing more than 2,500 entities) contribute to the PERF, JRF, and JRF II, which are agent multi-employer defined benefit pension plans. CalPERS acts as the common investment and administrative agent for the member agencies, including schools (for classified employees). The LRF is a single-employer defined benefit pension plan for the State of California. The VFF is an agent multi-employer defined benefit pension plan with 54 participating fire departments. The VFF provides cities, counties, or districts that have fire departments with volunteer firefighting members the opportunity to offer such members an award for lifelong and faithful volunteer service.

Members of the PERF, LRF, JRF, and JRF II become fully vested in their retirement benefits earned to date after five years (10 years for State Second Tier members) of credited service. VFF members become vested after 10 years of credited service and are eligible to receive an award payment at age 60.

Notes to the Basic Financial Statements

The PERF was established in 1932, the LRF in 1947, the JRF in 1937, JRF II in 1994, and the VFF in 1980. As of June 30, 2006 and 2005, the number of affiliated employers for the PERF, LRF, JRF, JRF II, and VFF are as follows:

	2006	2005
Public Employees' Retirement Fund		
State	1	1
School	61	61
Public Agency	1,483	1,462
Total Employers — Public Employees' Retirement Fund	1,545	1,524
Legislators' Retirement Fund	1	1
Judges' Retirement Fund	59	59
Judges' Retirement Fund II	59	59
Volunteer Firefighters' Award Fund	54¹	61

As of June 30, 2006 and 2005, benefit recipients and members in the PERF, LRF, JRF, JRF II, and VFF consisted of the following:

2006									
	PERF			Total PERF	LRF	JRF	JRF II	VFF	Total
	State	School	Public Agency						
Retirees	138,219	130,317	114,305	382,841	147	1,096	6	128	384,218

Note:

¹ The number of participating fire districts declined due to consolidation of reporting entities.

Notes to the Basic Financial Statements

The membership consists of the following categories.

PERF

- *Safety* — includes California Highway Patrol, peace officers, firefighters, and other employees whose principal duties are in active law enforcement or fire prevention and suppression work, or who occupy positions designated by law as safety member positions.
- *Schools* — includes non-teaching, non-certificated school employees.
- *State Industrial* — includes all employees of the Department of Corrections and the California Youth Authority who are not safety members.
- *General* — includes all other members, defined by statute as “miscellaneous” members.

LRF

- State Legislators
- Constitutional Officers
- Legislative Statutory Officers

JRF

- *Judges* — includes Supreme Court, Courts of Appeal, and Superior Courts appointed or elected before November 9, 1994.

JRF II

- *Judges* — includes Supreme Court, Courts of Appeal and Superior Courts appointed or elected on or after November 9, 1994.

VFF

- Volunteer Firefighters

Financing

The benefits for the PERF, LRF, JRF, and JRF II are funded by contributions from members and employers, and earnings from investments. The benefits for the VFF are funded solely by contributions from employers and earnings from investments. Member and employer contributions

for the PERF, LRF, JRF, and JRF II are a percentage of applicable member compensation. Member contribution rates for the PERF, LRF, JRF, and JRF II are defined by law and depend on the respective employer’s benefit formulas. Employer contribution rates are determined by periodic actuarial valuations or by State statute. Actuarial valuations are based on the benefit formulas and employee groups of each employer. Employer contributions, including lump sum contributions made when agencies first join the Public Employees’ Retirement Fund, are credited with a market value adjustment in determining contribution rates.

The required contribution rates of active plan members are based on a percentage of salary in excess of a base compensation amount ranging from \$133 to \$863 monthly. For the fiscal year ended June 30, 2006, the required contribution rates for active plan members are as follows.

PERF

State Employees:	
Miscellaneous & Industrial	5% or 6%
Miscellaneous & Industrial — Second Tier	0%
Safety	6%
Peace Officers & Firefighters	8%
California Highway Patrol	8%
Classified School Employees	7%
Public Agency Employees	5% to 9%
LRF	0%
JRF	8%
JRF II	8%
VFF	Non-Contributory

These contributions are deposited in a fund established for each entity for the purpose of creating actuarial reserves for future benefits.

All employees in a covered class of employment who work on a half-time basis or more are eligible to participate in the retirement plans. CalPERS administers several different retirement plans, each providing a monthly allowance based on age, years of credited service, the benefit formula, and highest average compensation over an established period of one year to three years. For the VFF, highest average compensation is not a consideration in determining a monthly allowance. All plans provide death and disability

Notes to the Basic Financial Statements

benefits except the VFF, which does not provide disability benefits. Within the PERF, the benefit provisions for the State and school employees are established by statute. The benefits for the public agencies are established by contract with the System, in accordance with the provisions of the Public Employees' Retirement Law. The benefits for the LRF are established in accordance with the provisions of the Legislators' Retirement Law. The benefits for the JRF are established in accordance with the provisions of the Judges' Retirement Law. The benefits for the JRF II are established in accordance with the provisions of the Judges' Retirement System II Law. The benefits for the VFF are established in accordance with the provisions of the Volunteer Firefighters' Length of Service Award Act.

In November 1990, Article IV, Section 4.5 was added to the State Constitution by adopting Proposition 140. This section effectively prohibited future Legislators from earning State retirement benefits for service in the Legislature on or after November 7, 1990, though it recognized vested pension benefits that had accrued before that date.

Due to the effects of Proposition 140, the Legislators' Retirement Fund is in transition. The number of Legislators eligible to participate in the LRF is declining as incumbent Legislators leave office and are replaced by new Legislators who are not eligible to participate in the program. Eventually, the only active members in the fund will be approximately 16 Constitutional Officers (including the Insurance Commissioner and members of the Board of Equalization) and approximately four Legislative Statutory Officers.

Costs of administering the funds are financed through contributions and investment earnings of the funds.

Termination

Upon separation from the retirement plans, accumulated member contributions are refundable, with interest credited through the date of refund, as required by applicable laws. Withdrawal of such accumulated contributions results in forfeiture of the related vested benefits.

In the event that public agencies elect to terminate their contracts with the retirement plans, accumulated member and employer contributions, interest, and the related liability for benefits may be transferred to the employers.

If amounts are not transferred to the employer, sufficient assets required to cover the related liability for benefits are retained in the retirement plans. Excess assets above those required, if any, are returned to the employer, while the employer is billed for any deficiency in assets.

Defined Contribution Plans

SPOFF

The State Peace Officers' and Firefighters' Defined Contribution Plan Fund (SPOFF) is a defined contribution pension plan established by Chapter 820 of the 1998 Statutes. The plan is a qualified money purchase pension plan under Section 401(a) of Title 26 of the Internal Revenue Code, and is intended to supplement the retirement benefits provided by the PERF to eligible correctional officers employed by the State of California.

Contributions to the plan are funded entirely by the employer, with a contribution rate of 2 percent of the employee's base pay, not to exceed contribution limits established by the Internal Revenue Code. Contribution requirements are established and may be amended through a Memorandum of Understanding from the State of California Department of Personnel Administration. These contributions, as well as the participant's share of the net earnings of the fund, are credited to the participant's account.

The net earnings of the fund are allocated to the participant's account as of each valuation date, in the ratio that the participant's account balance bears to the aggregate of all participants' account balances. The benefit paid to participants will depend only on the amount contributed to participant's account and earnings on the value of the participant's account. Plan provisions are established and may be amended by statute. At June 30, 2006 and 2005, there were 34,485 and 34,922 participants, respectively.

IRC 457

The Public Agency Deferred Compensation Program (IRC 457) is an Internal Revenue Code Section 457(g) defined contribution plan administered by State Street Bank & Trust Company (acting as an agent of CalPERS) to provide benefits at retirement to public agency employees. Plan participation is voluntary to employees of participating

Notes to the Basic Financial Statements

public agencies, and contributions are separate from the defined benefit contributions made to CalPERS.

Members may contribute up to the limits established under the Internal Revenue Code. At June 30, 2006 and 2005, there were 21,542 and 19,455 participants, respectively, with account balances.

Members of the plan are allowed to change their contribution amount, transfer account balances among 14 investment options, or change the contribution percentages designated to each option on a daily basis. The 14 investment options are: Money Market Fund, Stable Fixed Income Fund, Bond Fund, S&P 500 Equity Index Fund, Active Large Cap Equity Fund, Russell 2000 Index Fund, Active Small Cap Equity Fund, International Equity Fund, Conservative Allocation Fund, Moderate Allocation Fund, Aggressive Allocation Fund, Insured Money Market Account, Certificate of Deposit, and the Self-Managed Options. Members may access their funds upon retirement, separation from employment, or other distributions as allowed under the Internal Revenue Code. The CalPERS Board of Administration has authorization under the Government Code of the State of California to establish plan provisions.

RBF

The Replacement Benefit Fund (RBF) was established by Chapter 938 of the 1995 Statutes and initially funded in 1998 to provide benefits to members of the PERF whose retirement benefit exceeds Internal Revenue Code Section 415(b) limits. IRC Section 415(b) imposes a dollar limit on the annual retirement benefits an individual may receive from a qualified defined benefit pension plan.

The RBF is funded on a “pay-as-you-go” basis. That is, money collected from an employer during any calendar year must be paid to the retiree during that same year. Employer contributions must be in amounts “equivalent to” the benefits not paid as a result of the limitations of IRC Section 415(b). CalPERS calculates the member’s retirement allowance based on the member’s choice of retirement option. CalPERS also is responsible for calculating the applicable dollar limit under IRC Section 415(b), and setting the employer rates. At June 30, 2006 and 2005, there were 91 and 70 retirees, respectively, in the RBF.

SCPF

The Supplemental Contributions Program Fund (SCPF) was established January 1, 2000, by Chapter 307 of the 1999 Statutes, as a separate trust fund for the Supplemental Contributions Program (program), a defined contribution plan that provides supplemental benefits at retirement to members of CalPERS. The program is a qualified plan under Section 401(a) of Title 26 of the United States Code, administered by CalPERS.

Currently, the program is available only to State of California employees who are members of CalPERS. The program is entirely member funded, and participation is voluntary. Participant contributions are made on an after-tax basis and are separate from the defined benefit contributions made to CalPERS. Participants may be able to contribute to a deferred compensation or 401(k) plan in conjunction with the program, if the participant remains within the Internal Revenue Code Section 415(c) limits. Distributions are allowed only at retirement or permanent separation from employment. The CalPERS Board of Administration has authorization under the Government Code of the State of California to establish plan provisions. At June 30, 2006 and 2005, there were 879 and 873 participants in the SCPF, respectively.

Other Funds Administered by CalPERS

OASI

The Old Age & Survivors’ Insurance Revolving Fund (OASI) was established to consolidate the collection and payment for California public agencies of employee and employer contributions under the provisions of the federal Social Security regulations.

Federal legislation was enacted on October 21, 1986, which required direct remittance of Social Security contributions by individual public agencies and eliminates the intermediary collection and remittance of such contributions by individual public agencies and by State Social Security agencies, such as the OASI. As such, effective January 1, 1987, the OASI stopped receiving contributions from public agencies. Since then the OASI fund has operated in the capacity of an intermediary in the reconciliation of past year’s payroll contributions to the

Notes to the Basic Financial Statements

federal government and to reimburse the PERF for OASI contract management services. As reconciliations are completed, amounts will be collected and transmitted to the federal government or returned to the local governments. If any liabilities are owed which the OASI cannot collect, the State of California or the appropriate public agency is responsible for payment.

HCF

The Public Employees' Health Care Fund (HCF) was established under the Public Employees' Medical and Hospital Care Act (PEMHCA) as of July 1, 1988. The self-funded plans, PERS Choice and PERSCare, are risk pools available to all entities that contract for health insurance coverage under PEMHCA. Having all members in a single risk pool spreads catastrophic claims over a large base and minimizes administrative expenses. PERS Choice and PERSCare retain all the risk of loss of allowable health claims. Fund members are not subject to a supplemental assessment in the event of deficiencies. Premium rates for PERS Choice and PERSCare are set by the Board based on a trend analysis of the historic cost, utilization, demographics, and administrative expenses of the HCF to provide for the claims incurred and the actuarially determined required level of reserves.

PERS Choice and PERSCare rely on operating cash flows and investment income to fund health benefit payments. During the 2006 fiscal year, the Board continued to increase member premiums to mitigate the impact of increasing costs associated with enrollment growth, increases in provider pricing, and increased benefit utilization. Management believes that the current sources of funding for PERS Choice and PERSCare will be adequate to provide for benefits of the plans.

Public agencies participating in PERS Choice and PERSCare are required to make periodic premium payments based on rates as established by CalPERS. Plan members pay the difference between the premium rate and the employers' contribution. Administrative costs are financed through investment earnings.

CRF

The Public Employees' Contingency Reserve Fund (CRF) was established in 1962, with the passage of PEMHCA, to fund administrative costs related to the PEMHCA program, and as a contingency reserve for such items as increases in future rates or in future benefits. PEMHCA was expanded to include local public agency employees on a contract basis in 1967. The CRF is reimbursed by the State and contracting public agencies for costs incurred for administering the program.

PEMHCA establishes eligibility rules for the following:

- retirees and beneficiaries receiving health care benefits;
- terminated plan members entitled to but not yet receiving benefits; and
- active plan members.

Administrative costs include direct costs of the program and a proportionate share of indirect costs allocated to the CRF by the PERF. The administrative fee is determined as a percentage of insurance premiums paid by the employers. The administrative fee for the year ended June 30, 2006 and 2005, was 0.30 percent and 0.43 percent, respectively. Contribution rates are reviewed annually and are adjusted, if needed, to cover budgeted administrative costs.

The CRF also collects health care premiums from annuitants whose retirement allowances are not sufficient to pay their total contributions for the health care plans in which they are enrolled. The CRF remits these amounts to the Public Employees' Retirement Fund, which pays the appropriate health care plan.

Public agency employers whose employees do not elect PERS Choice and PERSCare submit the provider-determined, Board-approved premiums to the CRF which, in turn submits the premiums to the respective provider.

At June 30, 2006 and 2005, 1,137 and 1,142 entities participated in health insurance coverage under PEMHCA, respectively.

Notes to the Basic Financial Statements

LTCF

The Public Employees' Long-Term Care Fund (LTCF) began providing self-insured long-term care plans in 1995. The LTCF operates by providing long-term care coverage to enrolled members under the Public Employees' Long-Term Care Act (PERL, Chapter 15). The fund contracts with a third party to administer the program. Long-term care coverage is offered to all public employees (active or retired), their spouses, parents, parents-in-law, and siblings. The LTCF is a member-paid program with no contributions from employers. Premium rates are recommended to the Board by the program actuary and are set by the Board. Prospective enrollees apply directly to the program for long-term care coverage.

As of June 30, 2006, there are 173,935 enrollees and 3,115 participants receiving benefits. As of June 30, 2005, there were 173,807 enrollees and 2,853 participants receiving benefits.

The unrestricted net deficit in the LTCF of \$771.5 million at June 30, 2006, is attributable to an increase in estimated liabilities due to significant growth of inflation-adjusted policies. The LTCF is in the process of reviewing its current policies and exploring different options to address the deficit.

DCF

The Public Employees' Retirement System Deferred Compensation Fund (DCF) accounts for revenues and expenses associated with administrative and investment management services provided to other governments by CalPERS staff. The services provided assist other governments with their administration of deferred compensation plans. Revenues come from fees assessed the State of California Department of Personnel Administration, sponsor of the State of California Savings Plus Program, for managing one investment portfolio, and various State of California public agencies for managing 14 investment portfolios offered in the CalPERS IRC 457 plan. Expenses of the DCF are costs incurred to hire and support the CalPERS staff needed to implement the investment management and administrative services.

The DCF was established by Chapter 1659 of the 1990 Statutes, which added Government Code Sections 21420-21429. These Government Code Sections were subsequently renumbered to Government Code Sections 21670-21685 by Chapter 379 of the 1995 Statutes. Operation and initial funding of the DCF commenced July 1991.

The net assets of the portfolio managed by CalPERS for the State of California Savings Plus Program are not included in the accompanying financial statements.

Financial statements for the portfolio managed by CalPERS for the State of California Savings Plus Program may be obtained by contacting CalPERS.

SDF

The Special Deposit Fund (SDF) is a trust fund in the State Treasury that provides a depository for money which has been received in trust for a specific purpose by a State agency, but for which no other fund has been created to receive those funds. This fund is used by CalPERS, as a retiree prescription drug plan sponsor, to deposit money received from the Centers for Medicare and Medicaid Services (CMS) pursuant to the Part D Retiree Drug Subsidy of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003.

As a retiree prescription drug plan sponsor, CalPERS is eligible, under Part D guidelines, for a 28 percent subsidy payment based on each qualifying covered retiree's annual allowable prescription drug cost. CalPERS submits qualifying prescription drug expenditures to CMS and, upon approval, receives the reimbursement.

The Board of Administration requested the California Attorney General to render an opinion on the disposition of the moneys residing in the SDF. On November 2, 2006, the Attorney General opined that the Retiree Drug Subsidy funds within the SDF are to be deposited in the Public Employees' Contingency Reserve Fund. As determined by the CalPERS Board of Administration, these funds may be used to offset increases in future premium rates; reduce annuitant and employer contributions, cost containment, or increase benefits with respect to those funds that generate the Retiree Drug Subsidy.

Notes to the Basic Financial Statements

2. Summary of Significant Accounting Policies

Measurement Focus, Basis of Accounting & Basis of Presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America.

The accounts of CalPERS are organized and operated on the basis of funds. CalPERS has the following fund types at June 30, 2006.

Fiduciary funds — including pension trust and agency funds, account for assets held by the government in a trustee capacity or as an agent on behalf of others. The pension trust funds (PERF, LRF, JRF, JRF II, VFF, SPOFF, IRC 457, RBF, and SCPF) are accounted for on the flow of economic resources measurement focus and the accrual basis of accounting. Member contributions for the PERF, LRF, JRF, and JRF II are recognized in the period in which the contributions are due. Employer contributions for the PERF, LRF, JRF, JRF II, SPOFF, and RBF are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits under the defined benefit plans and refunds are recognized when due and payable in accordance with the terms of each plan. The agency funds (OASI and SDF) are custodial in nature and do not measure the results of operations. Assets and liabilities are recorded using the accrual basis of accounting.

Proprietary funds — including enterprise funds (LTCE, DCF, HCF, and CRF) are accounted for on the flow of economic resources measurement focus and use the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred. CalPERS applies all applicable GASB pronouncements in accounting and reporting for its proprietary operations, and follows FASB pronouncements as appropriate.

Operating revenues and expenses are distinguished from non-operating items and generally result from providing services in connection with ongoing operations. The principal operating revenues of the HCF, CRF, LTCE, and DCF are derived from self-insurance premiums and providing administrative services. Operating expenses include the cost

of claims and related administrative expenses. All revenues and expenses not meeting these definitions are reported as non-operating revenues and expenses.

GASB Statement No. 40

In March 2003, the GASB issued Statement No. 40, Deposit and Investment Risk Disclosures (GASB Statement 40). The provisions of GASB Statement 40 are effective for financial statements for periods beginning after June 15, 2004. GASB Statement 40 modifies previous custodial credit risk disclosure requirements and establishes more comprehensive disclosure requirements relating to other common risks of investment, such as credit risk, concentration of credit risk, interest rate risk, and foreign currency risk. CalPERS has implemented the provisions of GASB Statement 40 for the fiscal years ended June 30, 2006 and 2005.

GASB Statement No. 44

In May 2004, the GASB issued Statement No. 44, Economic Condition Reporting: the Statistical Section. The provisions for GASB Statement 44 are effective for financial statement statistical sections for periods beginning after June 15, 2005. GASB Statement 44 is intended to improve the understandability and usefulness of supplementary information in the statistical section. The objective of the statistical section information is to provide the users with additional historical perspective, context, and detail to the financial statements. Financial trend, debt capacity, demographic and economic, and operating information is displayed with 10-year trends in the statistical section. CalPERS has implemented the provisions of GASB Statement 44 for the fiscal year ended June 30, 2006.

Investments

As a result of Proposition 162 (State Constitution, Article XVI, Section 17), the CalPERS Board of Administration has plenary authority and fiduciary responsibility for the investment of monies. CalPERS invests in stocks, bonds, mortgages, real estate, alternative, and other investments. Alternative investments include two components: direct investments and partnerships. CalPERS maintains certain deposits, cash equivalents, and other investments with financial institutions.

Notes to the Basic Financial Statements

All investments are reported at fair value. The fair values of investments in securities are generally based on published market prices and quotations from major investment firms. Many factors are considered in arriving at fair value. In general, corporate bonds are valued based on yields currently available on comparable securities of issuers with similar credit ratings. Investments in certain restricted common stocks are valued at the quoted market price of the issuer's unrestricted common stock, less an appropriate discount. Investments held in internal investment pools have been reported at fair value.

Mortgages are valued on the basis of their future principal and interest payments discounted at prevailing interest rates for similar instruments. The fair value of real estate investments, principally rental property subject to long-term net leases, is estimated based on independent appraisals. Short-term investments are reported at market value, when available, or at cost plus accrued interest, which approximates market value when market values are not available. For investments where no readily ascertainable market value exists, management, in consultation with their investment advisors, has determined the fair values for the individual investments.

There are certain market risks, credit risks, liquidity risks, foreign currency exchange risks, and event risks which may subject CalPERS to economic changes occurring in certain industries, sectors, or geographies.

Derivatives

Under the State Constitution and statutory provisions governing CalPERS investment authority, CalPERS, through its outside investment managers, holds investments in futures and options and enters into forward foreign currency exchange contracts. Futures and options with fair values of approximately negative \$248.2 million and negative \$393.2 million are held for investment purposes and included within the financial statements at June 30, 2006 and 2005, respectively. Gains and losses on futures and options are determined based upon quoted market values and recorded in the Statement of Changes in Fiduciary Net Assets.

Due to the level of risk associated with certain derivative investment securities, it is reasonably possible that changes

in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Forward foreign currency exchange contracts are used primarily to hedge against changes in exchange rates related to foreign securities. At June 30, 2006 and 2005, CalPERS has approximately negative \$248.2 million and \$393.2 million net exposure to loss from forward foreign currency exchange transactions related to the approximately \$51 billion and \$43 billion international debt and equity portfolios, respectively.

CalPERS could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. CalPERS investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring procedures. CalPERS anticipates that the counterparties will be able to satisfy their obligations under the contracts.

Capital Assets

Capital assets are defined by CalPERS as assets with an initial individual cost of \$5,000 or more, and an estimated useful life in excess of one year.

Capital assets held by the PERF, consisting of buildings, furniture, and equipment, are recorded at cost or, if donated, at their estimated fair market value at the date of donation. Capital assets are depreciated over their estimated useful lives, ranging from one to five years for furniture and equipment and 40 years for buildings, using the straight-line method of depreciation.

The CalPERS Board of Administration authorized approximately \$265.0 million for the construction of additional headquarters space. The construction of the additional headquarters space was completed during the 2006 fiscal year. During the 2006 fiscal year, \$31.6 million was disbursed for building construction.

Actuarial Valuation

The information included in the required supplemental schedules is based on the actuarial valuations performed as of June 30, 2005, which is the latest available information.

Notes to the Basic Financial Statements

Significant actuarial assumptions used in the valuations are included in the notes to the required supplemental schedules.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets and net assets held in trust for pension benefits and changes therein, IBNR, claims payable, and disclosure of contingent liabilities at the date of the financial statements. Actual results could differ from those estimates.

3. Cash & Cash Equivalents

Cash and cash equivalents of approximately \$409.9 million and \$275.4 million in 2006 and 2005, respectively, represent amounts held in the CalPERS general operating accounts with the State Treasury. These monies are not individually identifiable by fund, as they are pooled with the monies of other State agencies and invested by the State Treasurer's Office.

4. Investments

For the years ended June 30, 2006 and 2005, State Street Bank & Trust Company was the master custodian for significantly all of the securities of CalPERS, however, certain securities are held by alternative investment managers. Real estate deeds of trust are held in the name of Limited Liability Corporations and Partnerships. The investments held by LRF, JRF II, VFF, SCPE, and LTCF have been commingled in internally managed investment pools. The investment pools are an internally managed domestic equity pool, an internally managed debt securities pool, and an international equity securities pool managed by State Street Bank & Trust Company. Each of the five funds has a different asset allocation based on Board-approved policy.

For the 2005-06 fiscal year, CalPERS continues to follow disclosure requirements of the Governmental Accounting Standards Board Statement 40. In accordance with GASB Statement 40, CalPERS discloses investments of all CalPERS managed funds that are subject to certain risks:

custodial credit risk, concentration of credit risk, interest rate risk, and foreign currency risk.

GASB Statement 40 investment risk disclosures begin on page 47, disclosing the investments subject to the various risks for the PERF and all other affiliate funds.

Securities Lending

The State Constitution and CalPERS Board policies permit CalPERS to use investments of the PERF to enter into securities lending transactions; collateralized loans of securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. CalPERS has contracted with Boston Global Advisors (BGA), Credit Suisse (CS), State Street Bank & Trust (SSB), and Metropolitan West Securities, LLC (Met West) as third-party securities lending agents to lend domestic and international equity and debt securities. Additionally, CalPERS contracts with eSecLending as an administrative agent for CalPERS principal borrowers.

Domestic and international securities are collateralized for cash at 102 percent and 105 percent, respectively, of the securities market value. Management believes CalPERS has minimized credit risk exposure to borrowers by requiring the borrower to provide collateralization greater than 100 percent of the market value of the securities loan. The securities loaned are priced daily.

In the event that a borrower fails to return the securities or fails to remit income distributions by the securities' issuers to CalPERS while the securities are on loan, the agent is responsible for the associated costs. Securities on loan can be recalled on demand by CalPERS, and loans of securities may be terminated by CalPERS or the borrower. CalPERS may enter into term loan agreements which are evaluated on an individual basis.

The cash collateral is invested in accordance with CalPERS investment guidelines in short-term, high-credit quality fixed income securities. CS, Met West, and CalPERS manage the cash collateral. Met West matches the duration of the collateral to the duration of the loans, whereas CS and CalPERS do not, since the loans associated with the collateral they manage are terminable at will. For the year

Notes to the Basic Financial Statements

ended June 30, 2006, the cash collateral invested by CS, Met West, and CalPERS in short-term securities had weighted average maturities of 413 days, 108 days, and 497 days, respectively, and durations of 43, 11, and 32 days, respectively.

Real Estate

Real estate investments are classified as investments in accordance with GASB Statement 25. Certain real estate investments are leveraged whereby partnerships have been established to purchase properties through a combination of contributions from CalPERS and other investors and through the acquisition of debt. At June 30, 2006, real estate equities of approximately \$28,679,057,000 are reported at estimated gross fair market value. Of this amount \$15.2 billion is equity and \$13.4 billion is debt.

Required repayment of real estate debt is as follows.

(Dollars in Thousands)

Year Debt Matures	Amount
2006	\$245,046
2007	2,187,923
2008	3,254,746
2009	810,811
2010-2014	3,649,617
2015-2019	3,299,935
Grand Total	\$13,448,078

Other Investment Income

Total other investment income earned by CalPERS in the 2006 fiscal year is \$767.4 million. This total consists of income from securities litigation, sale of fractional shares, other miscellaneous income earned across all other investment portfolios, amortization income earned in the fixed income portfolios, \$2.4 million from the directed brokerage program, and \$523.7 million resulting from a redistribution of income from the change in the net asset value of our real estate investments.

The following investment risk schedules disclose CalPERS investments subject to certain types of risk, pursuant to GASB Statement 40. Each schedule discloses investments of all funds managed by CalPERS subject to each type of risk. Some securities are held in internally-managed investment pools shared by all funds. Securities held in the SCPF, IRC 457, and SPOFF are excluded from these schedules because the investments are self-directed by participants.

Custodial Credit Risk

CalPERS does not have any funds or deposits that are not covered by depository insurance, which are either uncollateralized, collateralized with securities held by the pledging financial institution, or collateralized with securities held by the pledging financial institution's trust department or agent, but not in CalPERS name. Nor does CalPERS have any investments that are not registered in the

Notes to the Basic Financial Statements

name of CalPERS and are either held by the counterparty or the counterparty's trust department or agent, but not in CalPERS name.

Concentration of Credit Risk

CalPERS does not have investments in any one issuer which represent 5 percent or more of total fair value of all investments.

Interest Rate Risk

The risk changes in interest rates will adversely affect the fair value of an investment. This risk is managed within the portfolios using the effective duration or option-adjusted methodology. The System's investment policies require the option-adjusted duration of the total fixed income portfolio to stay within 20 percent of the option-adjusted duration of its benchmark (Lehman Brothers Long Liabilities). All individual portfolios are required to maintain a specified level of risk relative to their benchmark. Risk exposures are monitored daily. These are reported grouped by effective duration ranges.

Foreign Currency Risk

Foreign currency risk is defined as any deposits or investments that are denominated in foreign currencies, which bear a potential risk of loss arising from changes in currency exchange rates. The System's asset allocation and investment policies allow for active and passive investments in international securities. The System's target allocation is to have 33 percent of total global equity assets invested in international equities and 11.5 percent of total fixed income invested in international securities. Real estate and AIM do not have a target allocation for international investments. The System uses a currency overlay program to reduce risk by hedging approximately 25 percent of the developed market international equity portfolio. Currency exposures are monitored daily.

Notes to the Basic Financial Statements

CalPERS

Investment securities of all CalPERS managed funds that are subject to foreign currency risk.

Notes to the Basic Financial Statements

Credit Risk

Credit risk is defined as the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The System’s investment policies establish general as well as specific risk measures for the fixed income portfolio. From the most general perspective, 90 percent of the total fixed

income portfolio must be invested in investment-grade securities. Investment-grade securities are those fixed income securities with a Moody’s rating of AAA to BAA or a Standard & Poors rating of AAA to BBB. Each portfolio is required to maintain a specified risk level. Portfolio exposures are monitored daily.

CalPERS

Debt investment securities of all CalPERS managed funds at market value that are subject to credit risk.

CalPERS — At Market Value Subject to Credit Risk

Notes to the Basic Financial Statements

5. Contributions & Reserves

Employer Contributions Actuarially Determined & Contributions Made

Employer contributions are calculated as a percentage of employer payroll. The payroll for employees covered by the PERF, LRF, JRF, and JRF II in 2006 was approximately \$37.6 billion, \$1.9 million, \$122.4 million, and \$121.3 million, respectively.

The PERF and JRF II use a Modified Entry Age Normal Actuarial Cost Method, which is a projected benefit cost method. That is, the method takes into account those benefits that are expected to be earned in the future, as well as those already accrued.

According to this cost method, the normal cost for an employee pension liability is the level amount which would fund the projected benefit if it were paid annually from date of employment until retirement. The Entry Age Normal Actuarial Cost Method used by the PERF and JRF II is modified by CalPERS so that the employers' total normal cost is expressed as a level percentage of payroll. The PERF and JRF II use the level percentage of payroll method to amortize any unfunded actuarial liabilities.

The VFF uses the Unit Credit Actuarial Cost Method as the basis for its valuation. The LRF and JRF use the Aggregate Actuarial Cost Method as the basis for their valuations.

The significant actuarial assumptions used in the 2005 valuations to compute the actuarially determined contribution requirements for the PERF, JRF II, and VFF are the same as those used to compute the actuarial accrued liability.

Assumptions used in the actuarial valuations are included in the Notes to Required Supplemental Schedules.

Restrictions on Net Assets Available for Benefits

Included in the Net Assets Held in Trust for Pension Benefits is a restricted reserve that, by law, is retained in the PERF and LRF as a reserve against deficiencies in interest earned, potential losses under investments, court-mandated costs, and actuarial losses resulting from terminations, mergers, or dissolutions of contracting agencies. This reserve cannot

exceed 0.2 percent of total assets of the PERF and the LRF, and totaled approximately \$432.7 million and \$399.5 million as of June 30, 2006 and 2005, respectively.

PERF

Actuarial valuations of the PERF are performed annually. The last valuation was performed as of June 30, 2005, for the State, schools, and public agencies.

The total 2005 net retirement contributions for the PERF amounted to approximately \$9.2 billion, of which \$6.1 billion (the actuarially determined annual required contribution) came from 1,545 employers and approximately \$3.1 billion came from nearly 808,000 members. Normal cost is 10.356 percent of covered payroll, and amortization of the unfunded liabilities is 4.746 percent of covered payroll. These figures are averages for all employers. The actual figures vary by each employer's plan.

LRF

The current contribution requirements of the LRF are based on actuarially determined rates promulgated as part of legislation passed in 1977.

Actuarial valuations of the LRF are required to be carried out at least every two years. The Board of Administration utilizes these actuarial valuations to make recommendations to the State for financing the Fund. For the fiscal year ending June 30, 2006, there was no statutory contribution required based on the June 30, 2004 valuation.

JRF

Contributions made by the State of California to the JRF are made pursuant to State statute and are not actuarially determined; however, an actuarial valuation of the JRF assets and liabilities is performed every year and is used by CalPERS to make recommendations for financing the JRF.

The California law which states that on and after January 1, 2004, the JRF shall be funded and actuarially sound was amended in conjunction with the adoption of the Judges' Retirement System II Law, which, among other provisions, eliminated the requirement that the JRF be

Notes to the Basic Financial Statements

funded and actuarially sound. Recommendations to achieve the necessary level of contributions have been submitted by the CalPERS Board to the Legislature.

As of June 30, 2006, funding was provided from the following sources to meet benefit payment requirements.

- **Member Contributions** — 8 percent of applicable member compensation.
- **Employer Contributions** — 8 percent of applicable member compensation.
- **Filing Fees** — Varying amounts depending on fee rate and number of filings.
- **Investments** — Current yield on short-term investments.
- **State of California “Balancing Contributions”** — An amount required by the Judges’ Retirement Law, at least equal to the estimated benefits payable during the ensuing fiscal year less the sum of 1) the estimated member contributions during the ensuing fiscal year and; 2) net assets available for benefits at the beginning of the fiscal year.

Under the pay-as-you-go basis, short-term investments as well as contributions received during the year are used to make benefit payments. Management and legal counsel believe the State of California is legally required to provide these required contributions to fund the benefits.

For the year ended June 30, 2006, the actual contributions made by the State to the JRF were approximately \$120.6 million, which is significantly less than the actuarially determined annual required contribution of approximately \$194.9 million.

Because current contributions are used to make benefit payments, the fund does not retain the accumulated contributions of active members. The cumulative contributions of all currently active members since inception were approximately \$135.4 million and \$135.6 million at June 30, 2006 and 2005, respectively, which exceeded Net Assets Held in Trust for Pension Benefits by approximately \$117.5 million and \$118.3 million at June 30, 2006 and 2005, respectively.

JRF II

Actuarial valuations for the JRF II are required to be carried out annually. The legislated State contribution rate will be adjusted periodically as part of the annual Budget Act in order to maintain or restore the actuarial soundness of the fund. The last actuarial valuation was performed as of June 30, 2005.

For the year ending June 30, 2006, the statutory employer contribution rate was 19.848 percent based on the June 30, 2004 actuarial valuation. Therefore, for the year ended June 30, 2006, the contributions made by the State to the fund were approximately \$24.1 million, which is slightly less than the actuarially determined required contributions of approximately \$25.5 million.

VFF

The current contribution requirements of the VFF are based on actuarially determined rates promulgated as part of the Volunteer Firefighters’ Length of Service Award Act passed in 1979.

Actuarial valuations of the VFF are required to be carried out at least every two years. The last valuation was performed as of June 30, 2005. The Board of Administration utilizes these actuarial valuations to make recommendations for financing the fund.

Contributions for prior service credits are recognized as revenue by VFF at the time a contract with the participating agency is executed. The participating agency may elect to pay the contributions for prior service credits in a lump sum or over a period of up to 10 years.

6. Commitments

At June 30, 2006, CalPERS total capital commitments to private equity funds was \$32.6 billion. Of this amount, \$13.8 billion remained unfunded and is not recorded on the CalPERS balance sheet.

At June 30, 2006, CalPERS total commitments to purchase real estate equity was \$746.7 million.

Notes to the Basic Financial Statements

7. Contingencies

CalPERS has entered into agreements with a number of issuers of non-taxable debt to provide payment of principal and interest in the event of non-payment. CalPERS is paid a quarterly fee over the term of the agreement for each transaction. The majority of the transactions are supported by collateral, letters of credit from banks or bond insurers for repayment. As of June 30, 2006, the credit enhancement program had contingent liabilities of approximately \$562 million and net fee income of approximately \$1.4 million.

CalPERS is a defendant in litigation involving individual benefit payment and participant eligibility issues and arising from its normal activities. In the event of an adverse decision, any payments awarded by the courts would be recovered by CalPERS through prospective adjustments to the employer contribution rate. Based upon consultation with legal counsel, management believes there will be no material adverse effect on the basic financial statements as a result of the ultimate outcome of these matters.

8. Health Care Fund

Basis for Estimated Liabilities

The Public Employees' Health Care Fund (HCF) establishes claim liabilities based on estimates of the ultimate costs of claims (including future claim adjustment expenses) that have been reported but not settled and of claims that have been "incurred but not reported" (IBNR). The estimated claims liability was calculated by Blue Cross, the HCF's third-party administrator, at June 30, 2006, using a variety of actuarial and statistical techniques and adjusted for actual experience to produce current estimates that reflect recent settlements, claim frequency, and other economic and social factors. Adjustments to claims liabilities are charged or credited to expense in the periods in which they are made. The estimated claims liability of \$159.1 million is carried at its face amount, and no interest discount is assumed. The IBNR portion represents an estimate for claims that have been incurred prior to June 30, 2006, but have not been reported to the HCF.

Anticipated Investment Income

Anticipated investment income is not included in the calculation of the annual premium requirement for HCF members.

Reinsurance

The HCF has not entered into any reinsurance or excess insurance agreements.

9. Long-Term Care Fund

The Public Employees' Long-Term Care Fund (LTCF) estimate of the funding level to provide for the payment of future claim benefits is predicated upon participation levels that are expected to be achieved by the program. The premiums from the LTCF are recognized during the period covered.

The LTCF establishes the liability for future policy benefits based on the present value of future benefits and expenses less the present value of future premiums. The liability for future policy benefits was calculated by the fund's actuary, using a variety of actuarial and statistical techniques as part of their actuarial review as of June 30, 2006. Certain key assumptions used in this calculation are a discount rate of 7.79 percent (the average rate of assumed investment yields in effect for the current year), morbidity, disability continuance, mortality, voluntary termination, and claims expense. The total estimated liability for future policy benefits as of June 30, 2006, was \$2.5 billion. Of that amount, \$108.4 million is expected to be paid in fiscal year 2007 and is included in current liabilities.

Notes to the Basic Financial Statements

The following represents changes in the aggregate estimated claims liabilities of the HCF for the years ended June 30.

(Dollars in Thousands)

Notes:

¹ The Unfunded Actuarial Accrued Liability (net assets in excess of the total Actuarial Liability) of the PERF by major employer group from the June 30, 2005 valuation is as follows: 1) \$14,791 for the State of California, 2) \$2,530 for schools, and 3) \$9,300 for public agencies.

² Beginning with the June 30, 1997 valuation, actuarial valuations were performed using the Aggregate Cost Valuation Method, which does not identify unfunded actuarial liabilities. Prior to the June 30, 1997 valuation, actuarial valuations were performed using the Aggregate Entry Age Normal Cost Valuation Method.

Required Supplemental Schedule of Employer Contributions

Year Ended June 30	PERF Employer Contributions		LRF Employer Contributions	
	Annual Required Contribution	% of Required Contributions Made	Annual Required Contribution	% of Required Contributions Made
1997	\$2,285,043,412 ¹	147% ²	\$1,933,367	127.8% ³
1998	2,289,526,403	100	2,022,421	33.4
1999	1,598,316,666	100	— ⁴	N/A
2000	362,614,344	100	— ⁴	N/A
2001	321,618,855	100	— ⁴	N/A
2002	800,964,553	100	— ⁴	N/A
2003	1,925,043,858	100	— ⁴	N/A
2004	4,261,347,422	100	— ⁴	N/A
2005	5,774,120,281	100	— ⁴	N/A
2006	6,095,029,424	100	— ⁴	N/A

Notes:

¹ Employer contributions to the PERF are shown net of the reduction in actuarially determined contributions resulting from the usage of A.B. 702 credits of approximately \$323,000 in 1997.

² Includes \$1.2 billion payment resulting from a court ruling of the S.B. 240 lawsuit (*Board of Administration v. Wilson*) which was appealed by the State and denied review by the California Supreme Court in May 1997. The Annual Required Contribution for 1997 is not affected by this payment.

³ Includes additional contributions made in arrears. The Annual Required Contribution is not affected by this payment.

⁴ Based on the June 30, 2003, 2002, 2001, 2000, 1999, 1998, and 1997 actuarial valuations, the annual required contributions for the years ended June 30, 2006, 2005, 2004, 2003, 2002, 2001, 2000, and 1999 were \$0.

Notes to Required Supplemental Schedules

1. Actuarial Information

The information presented in the required supplemental schedules was determined as part of the actuarial valuations as of the dates indicated. Additional information as of the latest actuarial valuation is as follows.

	PERF	LRF	JRF	JRF II	VFF
Valuation Date	June 30, 2005	June 30, 2005	June 30, 2005	June 30, 2005	June 30, 2005
Actuarial Cost Method	Individual Entry Age Normal Cost	Aggregate Cost Method	Aggregate Cost Method	Aggregate Entry Age Normal Cost	Unit Credit
Amortization Method	Level Percentage of Payroll Closed	None ²	None ²	Level Percentage of Payroll Closed	Fixed Years
Remaining Amortization Period	29 Years for Schools, Average of 20 Years for Public Agencies, and 23 to 28 Years for the State Plans	None ²	None ²	Average of 29 Years	30 Years
Asset Valuation Method	Smoothing of Market Value	Smoothing of Market Value	Market Value	Smoothing of Market Value	Smoothing of Market Value
Actuarial Assumptions:					
Net Investment Rate of Return	7.75%	7.00%	7.00%	7.25%	7.50%
Projected Salary Increases ¹	Varies, Based on Duration of Service	3.25%	3.25%	3.25%	None
	2% or 3% for State and Schools	3.00%	3.25%	3.00%	None
Post Retirement Benefit Increase	Depending on Plans System Varies 2% to 5% for Public Agencies				
¹ Includes Inflation at:	3.00%	3.00%	3.00%	3.00%	N/A

² The Aggregate Cost Method does not identify or separately amortize unfunded actuarial liabilities.

Required Supplemental Schedule of Claims Development Information

The table on the next page illustrates how the HCF earned revenues and investment income compared to related costs of loss and other expenses assumed by the HCF as of the end of each of the years presented. The rows of the table are defined as follows.

- 1) This line shows the total of each fiscal year's earned contribution revenues and investment revenues.

2) This line shows each fiscal year's other operating costs of the HCF, including overhead and claims expense not allocable to individual claims.

3) This line shows the HCF's incurred claims and allocated claim adjustment expenses (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (called policy year).
- 4) This section shows the cumulative amounts paid as of the end of successive years for each policy year.

5) This section shows how each policy year's incurred claims changed as of the end of successive years. This annual re-estimation results from new information received on known claims, as well as emergence of new claims not previously known.

6) This line compares the latest re-estimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought. As data for individual policy years mature, the correlation between original estimates and re-estimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

Required Supplemental Schedule of Claims Development Information (continued)

Public Employees' Health Care Fund — June 30, 2006

(Dollars in Thousands)

	Fiscal & Policy Year Ended			
	1997	1998	1999	2000

Investment Section

We are \$200 billion strong and our goal is to achieve long-term, sustainable, risk-adjusted returns.

Chief Investment Officer's Letter

Investment Office
P.O. Box 2749
Sacramento, CA 95812-2749

June 30, 2006

The Board of Administration of the California Public Employees' Retirement System:

On behalf of CalPERS Investment Operations, I am pleased to present reports on the pension fund's investments, California investments, our investment performance, and investment-related fees and costs for the period ended June 30, 2006. This data was compiled by our Investment Operations staff, our pension consultant Wilshire Associates, and our master custodian State Street Bank & Trust. It is presented in accordance with statutes found in the Retirement Law. We voluntarily follow the CFA Institute performance and ethics standards.

We earned an 11.8 percent return (net of fees) on our investments for the one-year period ended June 30, 2006, raising our portfolio market value to a record \$212.1 billion.

We exceeded industry benchmarks in five of eight major investment portfolios during the fiscal year, and added approximately \$2.8 billion to the fund, mainly by taking advantage of developing market opportunities. Our strong performance marked the third straight year we earned double-digit returns. Our average annual investment return over the last 10 years is 9 percent.

At the end of the fiscal year, 61.2 percent of our portfolio was invested in public equity, 24.5 percent in bonds and other fixed income, 7.2 percent in real estate, 5.7 percent in private equity, and 1.4 percent in cash equivalents.

We continued to invest in the State of California, providing a strong economic boost for California's growth. At the end of the year, we had more than \$26 billion invested or committed for investment in California entrepreneurial businesses, real estate, housing, urban infill, and stocks and bonds in corporations that make California their home.

We enhanced our diversity outreach to emerging investment managers during the year to ensure that we were working with the broadest possible investment talent, perspectives, and experiences. We also implemented a number of environmental initiatives aimed at achieving positive financial returns, while fostering sustainable growth and sound environmental practices.

And finally, in the area of corporate governance, we continued significant efforts to improve executive compensation practices, as well as the transparency of environmental data. In addition, we launched an independent investigation into allegations of stock option backdating at more than 80 companies, we signed the United Nations Principles for Responsible Investment — a menu of possible global actions on environmental, social, and corporate issues — and we barred investments in nine companies until the government of Sudan halts the genocide.

A handwritten signature in dark ink, appearing to read "Russell Read".

Note:

Differences between Total Investment Value in the Summary of Investments and Total Investments shown on page 30 are due to differences in reporting methods. In accordance with GASB Statement No. 28, the financial statements include Securities Lending Collateral as part of Total Investments, which is not included here. The Summary of Investments also includes Net Investment Receivables/Payables that are not reported on page 30 in Total Investments.

Investment Performance — PERF

Wilshire Associates, the Board's pension consultant, prepares a Quarterly Report of Investment Performance for the Fund based on performance calculations made by the Fund's custodian, State Street Bank & Trust. The 1-year, 3-year, 5-year, and 10-year time-weighted rates of return for the year ended June 30, 2006, are:

Per guidelines recommended by the Chartered Financial Analyst Institute, the Master Custodian for CalPERS computes monthly returns for portfolios, composites, and total plan. For periods greater than a month, a time series of linked monthly returns is used, producing a time-weighted effect.

Additional information on CalPERS investment policies, operations, investment results, and detailed asset information can be found in the accompanying 2006 Operations Summary and on the CalPERS Web site.

Notes:

¹ The Asset Allocation Policy Index return equals the return for each asset class benchmark, weighted at the current target asset allocations.

² Includes currency overlay.

³ The National Council of Real Estate Investment Fiduciaries Index is on a quarter lag.

⁴ The Custom STIF Policy Index is a custom index maintained by SSGA.

³ The benchmark is Russell 3000 from July 2005 on. Prior to that, the benchmark was the Tobacco-Free S&P 500 Index.

Actuarial Section

Based on Actuarial Valuations
as of June 30, 2005

We manage the risk and volatility of assets and liabilities to ensure sufficient funds are available, first, to pay benefits and second, to minimize and stabilize contributions.

Actuarial and Employer Services Branch
P.O. Box 942709
Sacramento, CA 94229-2709

September 2006

The Board of Administration of the California Public Employees' Retirement System:

As authorized, the CalPERS actuarial staff perform annual actuarial valuations of the CalPERS State, schools, and public agency plans; the latest such valuations are as of June 30, 2005.

The funding objective for each of these plans is to accumulate assets equal to 100 percent of the accrued liability, as measured by the Entry Age Normal Cost method in a manner that keeps contributions approximately level as a percentage of payroll. Unfunded actuarial liabilities or surplus assets (excess assets) are amortized pursuant to Board policy such that the amortization payment is not less than that required to amortize the unfunded liability over 30 years.

The actuarial assumptions and methods used for funding purposes meet the parameters set for disclosures presented in the Financial Section by Governmental Accounting Standards Board Statement No. 25. In our opinion, the actuarial assumptions are internally consistent and produce results which are reasonable in the aggregate.

The valuations are based on the member and financial data as of the valuation date, extracted from the various CalPERS databases. Both the membership and financial data are subject to extensive tests for reasonableness.

Further, information has been provided by us for the completion of (i) the trend data schedules (Required Schedule of Funding Progress and Schedule of Employer Contributions) in the Financial Section, and (ii) Exhibits A through H in the Actuarial Section of the CAFR.

Ron Seeling, Ph.D., F.C.A., A.S.A., M.A.A.A.
Enrolled Actuary
Chief Actuary, CalPERS

CalPERS Actuarial Methods & Assumptions

Actuarial Methods

The ultimate cost that a retirement system such as CalPERS incurs is equal to benefits paid plus the expenses resulting from administration and financing. These costs are paid through contributions to the plan and investment earnings on the System's assets.

The actuarial valuations rely upon data extracted from central databases maintained by CalPERS. These databases are created from data supplied by the individual employers. The data was not audited by the actuarial staff, but appears to be reasonable for valuation purposes. Summary information regarding plan membership data for various groups is provided in Exhibits F through H.

Using each plan's schedule of benefits, member data described above, and a set of actuarial assumptions, the plan's actuary estimates the cost of the benefits to be paid. Then, using a particular actuarial funding method, the actuary allocates these costs to the fiscal years within the employee's career.

In the case of the CalPERS plans with pay-related benefits, the financial objective is to fund in a manner which keeps contribution rates approximately as a level percentage of payroll from generation to generation, while accumulating sufficient assets over each member's working career. The primary funding method used to accomplish this objective is the Entry Age Normal Cost Method. This method is used for all defined benefit pay-related plans within CalPERS and for the Judges' Retirement System II (JRS II). It is also used for the Indexed Level of 1959 Survivor Benefits. CalPERS uses the level dollar Aggregate Cost Method for those pay-related plans which are closed and declining in membership. This method is used for the Legislators' Retirement System (LRS) and the Judges' Retirement System (JRS).

For CalPERS non-pay-related plans, the financial objective is to produce annual costs that coincide with the value of benefits earned for that year. The Term Insurance Cost Method is used for the plans within the 1959 Survivor Program that are not indexed and for the State Group Term Life Insurance Program. The Unit Credit Cost Method is used for the Volunteer Firefighters' Length of Service Award System (VFLSAS).

Annual actuarial valuations are performed each June 30 using these methods. This report contains information through the most recent valuation date of June 30, 2005. Progress in financing can be found in the Summary of Funding Progress, Exhibits A and B.

The actuarial assumptions and methods used for funding purposes meet the parameters set for disclosures presented in the Financial Section by Governmental Accounting Standards Board Statement No. 25.

Entry Age Normal Cost Method

Under the Entry Age Normal Cost Method, projected benefits are determined for all members. For active members, liabilities are spread in a manner that produces level annual costs as a percent of pay in each year from the age of hire (entry age) to the assumed retirement age. The cost allocated to the current fiscal year is called the normal cost. The actuarial accrued liability for active members is then calculated as the portion of the total cost of the plan allocated to prior years.

The actuarial accrued liability for members currently receiving benefits, for active members beyond the assumed retirement age, and for inactive members entitled to deferred benefits is equal to the present value of the benefits expected to be paid. No normal costs are applicable for these participants.

CalPERS Actuarial Methods & Assumptions (continued)

The excess of the total actuarial accrued liability over the value of plan assets is called the unfunded actuarial accrued liability.

The required contribution is then determined by adding the normal cost and an amortization of the unfunded liability as a level percentage of assumed future payroll.

In the CalPERS case, the unfunded liability is broken down into components, or bases, according to their date of origin and the cause that gave rise to that component. A component of the unfunded liability that arose due to a change in plan provisions or in actuarial methods or assumptions is separately tracked and amortized over 20 years.

The actuarial assumptions discussed in this section are used to determine projected benefits. The effect of differences between those assumptions and the actual experience of the plan is calculated each year when the annual actuarial valuation is performed. These differences are actuarial gains or losses. Gains and losses are tracked separately and amortized over a rolling 30-year period.

A maximum 30-year amortization payment on the entire unfunded liability is enforced on the amortization methods described above. In addition, for those plans in which the amortization methods described above result in either mathematical inconsistencies or unreasonable actuarial results, all unfunded liability components are combined into a single base and amortized over a period of time, as determined by the CalPERS Chief Actuary.

Term Insurance Cost Method

The actuarial funding method for non-indexed levels of the 1959 Survivor Program is a modified Term Insurance Cost Method. Under this method, there is no actuarial accrued liability for active members; all liability is due to current beneficiaries. The normal cost is calculated as the amount needed to provide benefits to survivors of deaths expected in the next one-year period.

The Term Insurance Cost Method is also used for the State Group Term Life Insurance Program. The required contributions are calculated as one and one-half times the expected life insurance payments for the coming year less the current assets available to pay those benefits, but not less than zero.

Unit Credit Cost Method

The Unit Credit Cost Method is used to value the benefits provided by the VFLSAS. Under this method, the actuarial accrued liability is the sum of the present value of accrued benefits of all participants. The normal cost is the present value of the benefits earned during the valuation year by all participants.

Aggregate Cost Method

The Aggregate Cost Method is used for the LRS and JRS systems. Under this method, the difference between the present value of projected benefits and the assets of the plan are allocated over a specified period of time as a level dollar amount. The amount allocated to the current fiscal year is called the normal cost. There is no actuarial accrued liability calculated using the Aggregate Cost Method.

CalPERS Actuarial Methods & Assumptions (continued)

Asset Valuation Method

In order to dampen the effect of short-term market value fluctuations on employer contribution rates, the following asset-smoothing technique is used: first an Expected Value of Assets is computed by bringing forward the prior year's Actuarial Value of Assets and the contributions received and benefits paid during the year at the assumed actuarial rate of return. The Actuarial Value of Assets is then computed as the Expected Value of Assets plus one-fifteenth of the difference between the actual Market Value of Assets and the Expected Value of Assets as of the valuation date. However, in no case will the Actuarial Value of Assets be less than 80 percent or greater than 120 percent of the actual Market Value of Assets. This methodology is used in the valuations for all programs except the JRS, which uses an Actuarial Value of Assets equal to the Market Value of the Fund plus accrued interest.

Actuarial Assumptions

The actuarial assumptions used in determining actuarial liabilities and required employer contributions include both economic and non-economic assumptions. These assumptions represent the actuary's best estimate of anticipated future experience and are reviewed in depth periodically.

Economic Assumptions

The economic assumptions include an assumed inflation assumption of 3.0 percent compounded annually. The inflation assumption is a component of assumed investment return, assumed wage growth, and assumed future post-retirement cost-of-living increases.

Based upon the asset allocation of the Public Employees' Retirement Fund (PERF), the assumed investment return (net of administrative and investment expenses) is 7.75 percent per year, compounded annually. Different asset allocations and lower assumed investment returns apply to LRF, JRF, JRF II, and VFF.

The assumed investment returns for these four plans are 7.0 percent, 7.0 percent, 7.25 percent, and 7.5 percent, respectively.

For plans within CalPERS, the overall payroll is assumed to increase 3.25 percent annually. This is based upon the 3.0 percent inflation assumption and a .25 percent per annum productivity increase assumption. The overall payroll growth assumption is used to project future payroll over which the unfunded liability is amortized.

For plans within CalPERS, the assumed growth in an individual employee's future pay is composed of the 3.0 percent inflation component, an additional .25 percent per annum productivity component, and an annual merit increase based on the member's length of service. The service-based merit increase in an individual's salary recognizes that larger salary increases tend to occur earlier in an employee's career. Pay increase assumptions for individual members are shown for sample lengths of service in Exhibit C.

Non-Economic Assumptions

Non-economic assumptions for plans within the PERF are based upon demographic studies covering the period June 30, 1997 through June 30, 2002. The probabilities of service retirement, withdrawal from service, non-industrial disability, industrial disability, and death-in-service are shown for sample ages in Exhibit D. Individuals hired on or before June 30, 1982, are entitled to subsidized optional benefits. Certain valuation liabilities are increased to reflect this subsidy.

Post-retirement mortality tables are based on CalPERS experience. These tables are used to estimate the value of benefits expected to be paid for service and disability retirements. For disability retirements, impaired longevity is recognized by a separate table. Sample life annuity values based on these tables are shown in Exhibit E.

Changes Since Prior Valuation

Changes in Actuarial Methods

There were no changes in actuarial methods since the prior year's actuarial valuation.

Changes in Actuarial Assumptions

There were no changes in actuarial assumptions.

Changes in Plan Provisions

Public agencies can make changes to their plan provisions, and such changes occur on an ongoing basis. A summary of the plan provisions that were used for a specific plan can be found in Appendix B of the plan's annual valuation report.

For the State, there were two changes in the plan provisions from the prior valuation.

1. S.B. 183 (2001-02 Legislative Session) — Reclassified certain State miscellaneous members in Bargaining Unit 7 as State Safety members; effective July 1, 2004, on a prospective basis only. Overall, close to 3,600 members were reclassified.
2. S.B. 65 (2001-02 Legislative Session) — Provided a temporary (set to expire in 2006) benefit to CHP members that increased the final compensation used for calculating the retirement benefit by an amount equal to the member contribution. S.B. 439 of the 2003-04 Legislative Session made this benefit permanent.

Summary of Funding Progress

Unfunded Liability & Funded Ratios

For the plans in CalPERS, unfunded actuarial accrued liabilities are the difference between Entry Age Normal Accrued Liabilities and the assets of the Fund. It is required that these unfunded liabilities be financed systematically over future years.

Because of inflation, comparing the dollar amounts of assets, benefits paid, member salaries, and unfunded actuarial accrued liabilities can be misleading. While no one or two measures can fully describe the financial condition of the plan, unfunded actuarial accrued liability dollars divided by member salary dollars provide a meaningful index. The smaller the ratio, the stronger the System. Observation of this relative index over a period of years will give an indication of the financial strength of the System. Such a measure is presented in Exhibit A. The JRS and LRS use the Aggregate Cost Method to determine annual plan costs. Under the Aggregate Cost Method, no accrued liabilities are calculated, so this exhibit is not appropriate for these Systems.

Solvency Test

Exhibit B, Funding Progress — Solvency Test, demonstrates System solvency as measured under the Governmental Accounting Standards Board Statement No. 25. Again, as stated in the Summary of Funding Progress, the LRS and JRS use the Aggregate Cost Method; therefore, measuring System solvency under Exhibit B is not appropriate for these Systems.

Independent Review

To ensure the quality of its valuations, CalPERS contracts with independent consulting actuaries to review the valuations on a triennial basis.

Notes:

- ¹ The Unfunded Actuarial Accrued Liability (net assets in excess of the total Actuarial Accrued Liability) of the PERF by major employer groups from the June 30, 2005 valuation is as follows: 1) \$14,791 for the State of California, 2) \$2,530 for schools, and 3) \$9,300 for public agencies.
- ² Beginning with the June 30, 1997 valuation, actuarial valuations were performed using the Aggregate Cost Valuation Method, which does not identify unfunded actuarial liabilities. Prior to the June 30, 1997 valuation, actuarial valuations were performed using the Aggregate Entry Age Normal Cost Valuation Method.

Exhibit B – Funding Progress — Solvency Test

The funding objective for a retirement system is to be able to pay long-term benefit promises through contributions that remain approximately level from year to year as a percent of salaries earned by members. In this way, members and employers in each year pay their fair share for retirement services accrued in that year by the retirement system's members.

If a system follows level contribution rate financing principles, it will pay all promised benefits when due — the ultimate test of financial soundness.

A short-term solvency test is one means of checking a system's funding progress. In a short-term solvency test, the plan's present assets (investments and cash) are compared with 1) member contributions on deposit, 2) the liabilities for future benefits to persons who have retired or

terminated, and 3) the liabilities for projected benefits for service already rendered by active members. In a system that has been following the discipline of level contribution rate financing, the liabilities for member contributions on deposit (liability 1) and the liabilities for future benefits to present retirees (liability 2) will be fully covered by present assets, except in rare circumstances.

In addition, the liabilities for service already rendered by members (liability 3) will be partially covered by the remainder of present assets. Generally, if the system has been using level contribution rate financing, the funded portion of liability 3 will increase over time.

Exhibit B illustrates the progress of funding liability of the PERF, JRF, JRF II, LRF, and VFF.

Notes:

¹ Years of service.

² Age for Termination with Vested Deferred Benefits means Entry Age. For all other decrements, age means Attained Age.

Exhibit D – Sample Non-Economic Assumptions (continued)

Post-Retirement Mortality

Rates vary by age and sex. These rates are used for all plans.

Note:

These total counts and allowances are for service, disability, and industrial retirement, special death, 1957 Survivor, Pre-Retirement Option 2, and 1959 Survivor beneficiaries and non-members. This information was reviewed by the CalPERS Actuarial staff and appears to be reasonable.

Actuarial Certifications — Other Systems

Judges' Retirement System

April 2006

Actuarial Certification

As authorized by the CalPERS Board of Administration, we perform an annual actuarial valuation of the Judges' Retirement System; the latest such valuation is as of June 30, 2005.

To the best of our knowledge, this report is complete and accurate and contains sufficient information to fully and fairly disclose the actuarial funded condition of the Judges' Retirement System, as of June 30, 2005. Based on the employee data provided by the CalPERS Judges', Legislators', and Volunteer Firefighters' Office, the statement of assets provided by the CalPERS Fiscal Services Division, and the benefits as outlined in Appendix B, it is our opinion that the valuation has been performed in accordance with generally accepted actuarial principles and that the assumptions and methods, as prescribed by the CalPERS Board of Administration, are reasonable for the System.

Further, information has been provided by us for the completion of (i) the trend data schedules (Required Schedule of Funding Progress and Schedule of Employer Contributions) in the Financial Section, and (ii) Exhibits A through H in the Actuarial Section of the CAFR.

Judges' Retirement System II

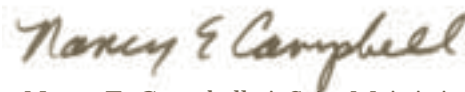

April 2006

Actuarial Certification

As authorized by the CalPERS Board of Administration, we perform an annual actuarial valuation of the Judges' Retirement System II; the latest such valuation is as of June 30, 2005.

To the best of our knowledge, this report is complete and accurate and contains sufficient information to fully and fairly disclose the actuarial funded condition of the Judges' Retirement System II, as of June 30, 2005. Based on the employee data provided by the Judges' Retirement System administrative staff at CalPERS, the statement of assets provided by the CalPERS Fiscal Services Division, and the benefits as outlined in Appendix B, it is our opinion that the valuation has been performed in accordance with generally accepted actuarial principles and that the assumptions and methods are reasonable for this plan.

Further, information has been provided by us for the completion of (i) the trend data schedules (Required Schedule of Funding Progress and Schedule of Employer Contributions) in the Financial Section, and (ii) Exhibits A through H in the Actuarial Section of the CAFR.

Chief Actuary, CalPERS

Actuarial Certifications — Other Systems (continued)

Legislators' Retirement System

May 2006

Actuarial Certification

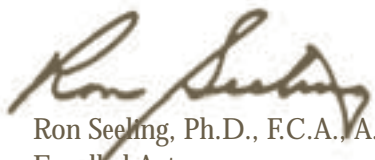

As authorized by the CalPERS Board of Administration, we perform an annual actuarial valuation of the Legislators' Retirement System; the latest such valuation is as of June 30, 2005.

To the best of our knowledge, this report is complete and accurate and contains sufficient information to fully and fairly disclose the actuarial funded condition of the Legislators' Retirement System. Based on the employee data provided by the CalPERS Judges', Legislators', and Volunteer Firefighters' Office, the statement of assets provided by the CalPERS Fiscal Services Division, and the benefits plans as outlined in Appendix B, it is our opinion that the valuation has been performed in accordance with generally accepted actuarial principles and that the assumptions and methods are reasonable for the System.

Further, information has been provided by us for the completion of (i) the trend data schedules (Required Schedule of Funding Progress and Schedule of Employer Contributions) in the Financial Section, and (ii) Exhibits A through H in the Actuarial Section of the CAFR.

Volunteer Firefighters' Length of Service Award System

April 2006

Actuarial Certification

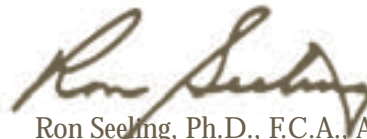

As authorized by the CalPERS Board of Administration, we perform an annual actuarial valuation of the Volunteer Firefighters' Length of Service Award System; the latest such valuation is as of June 30, 2005.

To the best of our knowledge, this report is complete and accurate and contains sufficient information to disclose fully and fairly the funded condition of the Volunteer Firefighters' Length of Service Award System (VFLSAS). Based on the participant and expense data provided by the Manager of the Volunteer Firefighters' System, the statement of assets provided by the CalPERS Fiscal Services Division, and the provisions of the system as outlined in Exhibit 7, it is our opinion that the valuation has been performed in accordance with generally accepted actuarial principles and that the assumptions and methods are reasonable for this plan.

Further, information has been provided by us for the completion of (i) the trend data schedules (Required Schedule of Funding Progress and Schedule of Employer Contributions) in the Financial Section, and (ii) Exhibits A through H in the Actuarial Section of the CAFR.

Notes:

¹ Starting with the June 30, 2006 Comprehensive Annual Financial Report, CalPERS changed the mechanism for reporting this category.

² This total differs from Total Benefit Recipients on page 137. Total Benefit Recipients shown here include Active Death Benefits paid as a result of a member death prior to retirement.

CalPERS Program Data

Primary Benefits

Benefits are paid according to the category of employment and the type of benefit coverage provided by an employer. Local agencies have variations in benefits due to their specific contract obligations with CalPERS.

The four categories of membership are:

Miscellaneous Members — staff, operational, supervisory, and all other eligible employees who are not in special membership categories.

Safety Members — California Highway Patrol officers, police officers, firefighters, and other employees whose principal duties are in active law enforcement or fire prevention and suppression work, or who occupy positions designated by law as safety member positions.

State Industrial Members — employees of the Department of Corrections and the California Youth Authority who have the same service retirement and other benefits as miscellaneous members, but who also have industrial death and disability benefits under certain limited circumstances.

State Peace Officer/Firefighter Members — State employees who are involved in law enforcement, firefighting and fire suppression, public safety, protective services, or the management and supervision thereof, whose positions are defined as State peace officer/firefighter members in the Government Code or by the Department of Personnel Administration.

Separation from Employment/Refunds

At permanent separation from employment, members may either leave their contributions on deposit and defer retirement¹ or terminate membership by electing to take a refund of member contributions plus interest (compounded annually). With a refund election, CalPERS is required to deduct federal withholding of 20 percent from the untaxed portion of the refund, unless the taxable portion is directly rolled over to a qualified plan or IRA.

Service Retirement

State Miscellaneous & State Industrial Members (First Tier), School Members & University Members
2 Percent at 55 Formula

Service not coordinated with Social Security — A guarantee of 2 percent of final compensation² at age 55 for each year of service credit. Retirement may begin at age 50 with a reduced benefit rate, or after age 55 with an increased benefit rate to age 63.

Service coordinated with Social Security — Same basic benefit rate; however, there is a reduction of \$133.33 from the final compensation³ before benefits are determined.

Local Miscellaneous Members 2 Percent at 60 Formula

Service not coordinated with Social Security — A guarantee of 2 percent of final compensation at age 60 for each year of service credit. Retirement may begin at age 50 with a reduced benefit rate, or after age 60 with an increased benefit rate to age 63.

Service coordinated with Social Security — Same basic benefit rate; however, there is a reduction of \$133.33 from the final compensation before benefits are determined.

Notes:

- ¹ A member with less than the required amount of service credit must return to CalPERS-covered employment to obtain the minimum service credit required to be eligible for retirement.
- ² The term “final compensation” appears throughout this section. It means the average payrate and special compensation over the last three consecutive years of employment (or one year for State and school members or as a contract option for local members) unless the member elects a different period with a higher average.
- ³ School member final compensation for service earned on and after January 1, 2001 is not subject to reduction.

CalPERS Program Data (continued)

State Miscellaneous & State Industrial Members (Second Tier) 1.25 Percent at 65 Formula

A guarantee of 1.25 percent of final compensation at age 65 for each year of service credit. Retirement may begin at age 55, or as early as age 50 (if there is a combination of First Tier and Second Tier service; a reduced benefit rate will apply).

Local Miscellaneous Members (Second Tier) 1.5 Percent at 65 Formula

A guarantee of 1.50 percent of final compensation at age 65 for each year of service credit. Retirement may begin at age 55, or as early as age 50 if there is a combination of First Tier and Second Tier service (a reduced benefit rate will apply).

Local Miscellaneous Members 2 Percent at 55 Formula

Service not coordinated with Social Security — A guarantee of 2 percent of final compensation at age 55 for each year of service credit. Retirement may begin at age 50 with a reduced benefit rate, or after age 55 with an increased benefit rate to age 63.

Service coordinated with Social Security — Same basic benefit rate; however, there is a reduction of \$133.33 from the final compensation before benefits are determined.

Local Miscellaneous Members 2.5 Percent at 55 Formula

Service not coordinated with Social Security — A guarantee of 2.5 percent of final compensation at age 55 for each year of service credit. Retirement may begin at age 50 with a reduced benefit rate.

Service coordinated with Social Security — Same basic benefit rate; however, there is a reduction of \$133.33 from the final compensation before benefits are determined.

Local Miscellaneous Members 2.7 Percent at 55 Formula

Service not coordinated with Social Security — A guarantee of 2.7 percent of final compensation at age 55 for each year of service credit. Retirement may begin at age 50 with a reduced benefit rate.

Service coordinated with Social Security — Same basic benefit rate; however, there is a reduction of \$133.33 from the final compensation before benefits are determined.

Local Miscellaneous Members 3 Percent at 60 Formula

Service not coordinated with Social Security —

A guarantee of 3 percent of final compensation at age 60 for each year of service credit. Retirement may begin at age 50 with a reduced benefit rate.

Service coordinated with Social Security — Same basic benefit rate; however, there is a reduction of \$133.33 from the final compensation before benefits are determined.

Local Safety Members 2 Percent at 50 Formula

2 percent of final compensation for each year of service for retirement at age 50, with an increased benefit rate to age 55. The maximum allowance payable is 90 percent of final compensation.

Local Safety Members 2 Percent at 55 Formula

2 percent of final compensation for each year of service for retirement at age 55. The maximum allowance payable is 90 percent of final compensation. Retirement may begin at age 50 with a reduced benefit rate.

Local Safety Members Half Pay at 55 Formula

This benefit is no longer available as a contract amendment. Only a small number of local agencies are still covered under this formula which guarantees one-half of final compensation at age 55 with 20 or more years of service credit. Retirement may begin at age 50 with a reduced benefit rate.

State Safety Members & Local Safety Members 2.5 Percent at 55 Formula

This benefit is no longer available as a contract amendment. It provides 2.5 percent of final compensation for each year of service for retirement at age 55. The maximum allowance payable is 80 percent of final compensation for State safety members and 90 percent for local safety members. Retirement may begin at age 50 with a reduced benefit rate.

CalPERS Program Data (continued)

State Patrol Members & Local Safety Members
3 Percent at 50 Formula

3 percent of final compensation for each year of service for retirement at age 50. The maximum allowance payable is 90 percent of final compensation for State patrol members and local safety members.

State Peace Officer/Firefighter Members &
Local Safety Members 3 Percent at 55 Formula

3 percent of final compensation for each year of service for retirement at age 55. The maximum allowance payable is 90 percent for State peace officer/firefighter members and local safety members. Retirement may begin at age 50 with a reduced benefit rate.

Disability Retirement

For Most Members

A monthly allowance of 1.8 percent of final compensation for each year of service, improved under certain conditions to 33⅓ percent of final compensation, applicable to members with at least five years of service credit.

By Contract Amendment Only for Local Agencies

A monthly allowance of 30 percent of final compensation, plus an additional 1 percent for each year of service over five years to a maximum of 50 percent.

For State Second Tier Members

A monthly allowance of 1.125 percent of final compensation for each year of service, improved under certain conditions to 33⅓ percent of final compensation, applicable to members with at least 10 years of service credit or five years if credited as of January 1, 1985.

For Local Second Tier Members

A monthly allowance of 1.35 percent of final compensation for each year of service, improved under certain conditions to 33⅓ percent of final compensation, applicable to members with at least five years of service credit.

Industrial Disability Retirement

For Most Members

A monthly allowance of 50 percent of final compensation, applicable to patrol members, State and local safety members, State peace officer/firefighter members, State industrial members, local miscellaneous members (by contract amendment only), and certain State miscellaneous members defined by law. The member must be serving in one of these categories at the time the industrial disability occurs. State members in certain bargaining units are eligible for 60 percent of final compensation if disabled for any job in State service and the injury occurred on or after January 1, 1993 and on or before December 31, 1999.

By Contract Amendment Only for Local Agencies

A monthly allowance of 75 percent of final compensation, if found totally disabled.

By Contract Amendment Only for Local Agencies

A monthly allowance of 50 percent to 90 percent of final compensation, depending on the disability rating by the Workers' Compensation Appeals Board.

Death Benefits (Before Retirement)

Basic Death Benefit — All Members Except State Employees

Eligible to retire or not — A return of member contributions plus interest (compounded annually) and an employer-paid portion equal to one month's compensation earnable for each year of current service to a maximum of six months.

Basic Death Benefit — State Employees Only

Eligible to retire or not eligible to retire with 20 years or more of State service credit — A return of member contributions plus interest (compounded annually) and a State-paid portion equal to six months' pay (50 percent of the member's earnable pay for the 12 months prior to the member's death).

CalPERS Program Data (continued)

Not eligible to retire with less than 20 years of State service credit — A return of only the member contributions plus interest (compounded annually).

Insurance Benefit — State Employees Only

Eligible to retire or not eligible to retire with 20 years or more of State service credit — \$5,000 in a lump sum.

Not eligible to retire with less than 20 years of State service credit — \$5,000 in a lump sum plus six months' pay (50 percent of annual compensation).

Alternate Death Benefit ¹ — For State Members in Bargaining Units Contracting for This Benefit, Who Are Not Eligible to Retire, With 20 Years or More of State Service Credit

A monthly allowance payable to a surviving spouse or registered domestic partner until death, then to children under age 18. It is calculated similarly to pre-retirement Option 2 (if the beneficiary is a spouse or registered domestic partner), or like a 1957 Survivor Benefit (if the beneficiary is a minor child), as though the member had been old enough to retire. A spouse or registered domestic partner or minor child may receive continued health and dental insurance with the Alternate Death Benefit.

Alternate Death Benefit for Firefighters — Local Agency Employers Contracting for This Benefit, With 20 Years or More of Total Service Credit

A monthly non-job-related allowance payable to a surviving spouse or registered domestic partner until death, then to children under age 18. It is calculated similarly to Pre-Retirement Option 2 (if the beneficiary is a spouse or registered domestic partner, even if the agency does not contract separately for the Pre-Retirement Option 2 benefit), or like a 1957 Survivor Benefit (if the beneficiary is a minor child), as though the member had either been old enough to retire (if the member died before reaching retirement age), or based on the member's actual age if the member was eligible to retire at the time of death. This benefit applies to all service credit earned by the member,

including service that may have been earned with a local agency that does not contract for the Alternate Death Benefit, as long as the member was employed at the time of death by a local agency that provides this benefit in their contract.

Pre-Retirement Option 2W Benefit — Local Agencies by Contract, Married, or Registered Domestic Partnership

A monthly allowance payable to the surviving spouse or registered domestic partner until death, equal to what the deceased member would have received had they retired on the date of their death and elected Option 2W Benefit.

Pre-Retirement Option 2W Benefit ¹ — For All State Members, Married, or Registered Domestic Partnership

A monthly allowance payable to the surviving spouse or registered domestic partner until death, equal to what the deceased member would have received had they retired on the date of their death and elected Option 2W.

1957 Survivor Benefit ¹ — Local Members, Married, or Registered Domestic Partnership

For all members eligible to retire who are married or in a registered domestic partnership, a monthly allowance payable to the surviving spouse or registered domestic partner until death, then to children under age 18, equal to one-half of the highest allowance (unmodified) the member would have received had they retired on the date of death.

1957 Survivor Benefit ¹ — All Members, Not Married, or No Registered Domestic Partnership

For all members eligible to retire who are not married or in a registered domestic partnership, a monthly allowance payable to the unmarried surviving minor children until age 18, equal to one-half of the highest allowance (unmodified) the member would have received had they retired on the date of death. Once allowance stops, the total allowance paid is compared to the Basic Death Benefit amount, and any difference is paid in a lump sum to all of the member's surviving children.

Note:

¹ The surviving spouse or registered domestic partner of other than a State member, or a guardian of a minor child, may elect the Basic Death Benefit or the 1957 Survivor Benefit. The surviving spouse or registered domestic partner of a State member may elect the Basic Death Benefit or the Pre-Retirement Option 2W Death Benefit.

CalPERS Program Data (continued)

1959 Survivor Benefit — State & School Members & by Contract Option, Local Agency Members Not Coordinated With Social Security

A monthly benefit paid to survivors of deceased members who died prior to retirement. This benefit is similar to the Social Security Survivor Benefit and is paid in addition to any other applicable pre-retirement death benefit, except the Special Death Benefit.

Special Death Benefit ¹ — Survivors of Patrol, State & Local Safety, State Industrial & State Peace Officer/Firefighter Members, State Miscellaneous ² & Local Miscellaneous by Contract Amendment ²

A monthly allowance equal to 50 percent of final compensation payable to the surviving spouse or registered domestic partner until death, or if no spouse, to natural or adopted unmarried children up to age 22. The monthly allowance is recalculated annually on October 1 based on the salary rates for employees who work in the position the member held at the time of death until such time as the member would have attained age 50.

Special Death Benefit ¹ — Violent Death

Provides increased benefits (up to 75 percent of final compensation) based upon the number of surviving children, if the member’s death is the result of external violence or physical force.

Death Benefits (After Retirement)

Retired Death Benefit — State Members Only

A \$2,000 lump sum payable in addition to any optional settlement elected.

Retired Death Benefit — Local & School Members

A \$500, \$600, \$2,000, \$3,000, \$4,000, or \$5,000 lump sum (depending on the employer contract) payable in addition to any optional settlement elected.

Notes:

¹ The Special Death Benefit is payable if the member’s death is job related.
² The survivor of a State or local miscellaneous member qualifies for the Special Death Benefit if the member was killed or fatally injured while performing their official duties.

Survivor Continuance Benefit — State Members, School Members & by Contract Option, Local Agency Members

Service not coordinated with Social Security — 50 percent of the deceased member’s unmodified retirement allowance amount will continue to an eligible survivor.

Service coordinated with Social Security — 25 percent of the deceased member’s unmodified retirement allowance amount will continue to an eligible survivor.

Optional Settlements

For All Members

All the disability and service retirement allowances discussed in this section are the highest (unmodified) allowances payable to a retired member. There are six optional settlements to allow a member to reduce their allowance to provide a benefit to a named beneficiary at the member’s death. Under two of these options, if the beneficiary predeceases the member, the member’s allowance will be increased to the higher (unmodified) amount.

Cost-Of-Living Adjustments

For All Members — Except State Second Tier

A maximum of 2 percent compounded annually (up to 5 percent maximum as a contract option for retired members of local agencies).

For State Second Tier Members Only

A fixed 3 percent compounded annually.

Notes:

- ¹ The Alternative Retirement Program (ARP) is a mandated savings plan for State miscellaneous and industrial employees hired after August 11, 2004, during their first two years of employment. While contributing to ARP during that period, they are also “non-contributing” CalPERS members.
- ² The number of University of California members continues to decline since new employees must join the University of California Retirement System (UCRS).
- ³ These payments were made from the Purchasing Power Protection Account, which is structured to maintain current benefit levels and to restore CalPERS allowances to 75 percent of their original purchasing power (80 percent for public agencies).
- ⁴ The actual number of benefit recipients is by the employer category from which they retired, regardless of whether they had service in other employer categories. The total includes only those recipients receiving a monthly allowance, and does not include recipients of one-time only payments.

Note:

¹ Includes "penalty interest" of \$2,767 for pre-retirement and \$6,098 for post-retirement death payments. Penalty interest is required when CalPERS is unable to pay death benefits within 45 days of receiving all documents establishing entitlement. The penalty interest rate is paid for each day exceeding the 45-day time limit, based on the interest crediting rate or the net earnings rate (including capital gains and losses) whichever is greater.

CalPERS Public Agency Employers

Contract Actions Summary

On June 30, 2006, 1,544 public agency contracts provided retirement, death, and survivor benefits for employees of 57 county superintendents of schools; four school district offices; 446 cities and towns; 36 counties; and 1,001 districts and other public agencies. The 57 county superintendents of schools contracts provide benefits for 1,053 school districts, bringing the total number of public agency employers to 2,597.

	Added	Merged	Terminated	Total
County Superintendents of Schools (for 1,053 school districts)	—	—	—	57
Los Angeles City Schools and Community College Districts	—	—	—	2
Los Angeles County Superintendents of Schools and San Diego County of Superintendent of Schools	—	—	—	2
Cities/Towns	—	—	—	446
Counties	—	—	—	36
Districts and Other Public Agencies	23	-1	-1	1,001
Total Public Agency Contracts	23	-1	-1	1,544

Amendments

Public agency contracts vary depending upon the member categories covered, the formula the agency elects to provide, and the optional benefit provisions selected from the group of approximately 51 benefits. These optional benefits may be provided at the time the original contract is established or they may be added later through the contract amendment process.

During the 2005-06 fiscal year, 204 benefit changes were made through 163 contract amendments. The benefit formula changes for public agencies included: 28 to provide the 2.7% at 55 formula for active miscellaneous members; 28 to provide the 2.5% at 55 formula for active miscellaneous members; five to provide 3% at 60 formula for active miscellaneous members; eight to provide 2% at 55 formula for miscellaneous members; 25 to provide 3% at 50 formula for safety members; nine to provide 3% at 55 formula for safety members; and four to provide 2% at 50 formula for safety members.

There were no new optional benefits added during the year.

Two Years of Additional Service Credit — The Golden Handshake

Contracting agencies may amend their contracts to provide additional service credit if there are impending mandatory

transfers, layoffs, or demotions. Eligible employees who retire within a 90- to 180-day window period established by the employer receive two years additional service credit. The county schools may also contract for this benefit when there is an impending curtailment of, or change in the manner of performing services, and their best interest would be served by granting the additional service credit. Once the contract is amended, the employer may establish additional window periods.

In the 2005-06 fiscal year, 10 public agencies amended their contracts to provide the two years of additional service credit and 23 additional window periods were established. The County Offices of Education established 74 additional window periods for the Golden Handshake benefit.

CalPERS Public Agency Employers (continued)

Reciprocal Systems

Reciprocity is a valuable addition to the CalPERS benefit package. Its purpose is to encourage career public service, by allowing members to move between employers under different public retirement systems without losing their retirement and related benefits. The following retirement systems have reciprocity with CalPERS.

Counties Under the County Employees' Retirement Law of 1937

Alameda	Sacramento
Contra Costa	San Bernardino
Fresno	San Diego
Imperial	San Joaquin
Kern	San Mateo
Los Angeles	Santa Barbara
Marin	Sonoma
Mendocino	Stanislaus
Merced	Tulare
Orange	Ventura

The University of California Retirement Plan (UCRP)

Reciprocal Public Retirement Systems

California Administrative Services Authority
 Concord, City of
 Contra Costa Water District
 Costa Mesa, City of (safety only)
 East Bay Municipal Utility District
 East Bay Regional Park District (safety only)
 Fresno Employees Retirement System
 Long Beach Schools Business Management Authority
 Los Angeles, City of
 Los Angeles County Metropolitan Transportation Authority
 (Non-Contract Employees' Retirement Income Plan)
 Oakland, City of (non-safety only)
 Pasadena, City of (fire and police only)
 Sacramento, City of
 San Clemente, City of (non-safety only)
 San Diego, City of
 San Francisco, City & County of
 San Jose, City of
 San Luis Obispo, County of

Systems with Limited Reciprocity

Judges' Retirement System
 Judges' Retirement System II
 Legislators' Retirement System
 California State Teachers' Retirement System

Participating Public Agencies by Type

Total number of CalPERS members for each agency follows its name.

Judges’ Retirement System Program Data

Primary Benefits

The Judges’ Retirement System (JRS) was established in 1937. The operational activities of the JRS were transferred from the State Controller’s Office to CalPERS in 1979. Benefits payable through the JRS are financed by the General Fund, the payroll contributions of members, and the State’s contribution as an employer. Both employer and members contribute at the rate of 8 percent of compensation.

Membership

The Judges’ Retirement System provides retirement, death, health, and dental benefits for Supreme and Appellate Court Justices, Superior Court Judges, and beneficiaries.

Service Retirement

Retirement Age

Members must be at least age 60 with 20 years of service, or age 70 with at least 10 years of service.

Retirement Benefit Formula

The retirement allowance is a percentage of the current salary of the last judicial office held and is increased proportionally with active judicial salaries. The allowance is based on a member’s age and years of service as follows:

Age	Years of Service	Retirement Allowance
60–70	20	75%
66	18	65%
67	16	65%
68	14	65%
69	12	65%
70	10	65%

Judges can work as long as they want and receive their full pension of either 65 percent or 75 percent (depending on credited service). In addition, a surviving spouse benefit of at least one-half of the judge’s allowance is provided.

Deferred Retirement

Judges are eligible for deferred retirement at any age if they have at least five years of service. However, judges are not paid the allowance until they reach the age they would be eligible for normal retirement if they had remained in office. A judge must be at least age 63, or age 60 with 20 years of service, to receive a retirement allowance. The allowance is based on years of service multiplied by a percentage of the judge’s final salary — varying from 2 percent for five years to 3.75 percent for 12 or more years of service. The maximum benefit they can receive is 75 percent of salary.

Disability Retirement (Non-Work Related)

Judges must apply to the Commission on Judicial Performance to receive a disability retirement. There is no age requirement.

The service requirement is four years. The retirement allowance is 65 percent of the judge’s final salary, or 75 percent of their final salary if the judge has 20 or more years of service.

Judges’ Retirement System Program Data (continued)

Disability Retirement (Work Related)

Judges receive the same amount as those for a non-work related disability. Any person becoming a judge between January 1, 1980 and December 31, 1988, must have at least two years of judicial service; or after January 1, 1989, must have four years of judicial service, unless the disability is a result of injury or disease arising out of and in the course of judicial service.

Death Benefits (Before Retirement)

Not Eligible to Retire

Spouses or registered domestic partners can receive 25 percent of current active judges’ salary for life or return of contributions plus one month’s salary, for each year of service not to exceed six months; or the surviving spouse or registered domestic partner can elect a monthly allowance for life, if the judge had paid an extra \$2 per month and had 10 to 20 years of service. This allowance would be equal to 1.625 percent of the salary multiplied by the number of years of service.

Eligible to Retire

Spouses or registered domestic partners receive one-half of what the retirement allowance would have been if the judge had retired on date of death.

Death Benefits (After Retirement)

Spouses or registered domestic partners receive one-half of the retirement pension for life, if the member retired with the standard retirement benefit formula, or on disability.

Judges may elect to take a reduced retirement allowance in order to enhance the survivor benefits to their spouse, registered domestic partner, or a designated beneficiary.

Cost-Of-Living Adjustments (COLA)

The allowance increases are based on the current salary of an active judge. Retirees receive the same increase as active judges.

Judges’ Retirement System II Program Data

Primary Benefits

The Judges’ Retirement System II (JRS II) was established in 1994 to create a fully funded, actuarially-sound retirement system for judges appointed or elected on or after November 9, 1994. This system provides a unique combination of two basic types of retirement benefits: a defined benefit plan and a monetary credit plan. The defined benefit plan provides a lifetime monthly retirement allowance of up to 75 percent of final compensation. The monetary credit plan allows for a refund of member contributions, a portion of the employer contributions, and interest. Members contribute at the rate of 8 percent of compensation.

Membership

The JRS II provides retirement, death, health, and dental benefits for Supreme, Appellate Court Justices, and Superior Court Judges, first appointed or elected after November 9, 1994, and their beneficiaries.

Service Retirement

Retirement Age

Judges must be at least age 65 with 20 years of service or age 70 with a minimum of five years of service to receive the defined benefit plan. Judges must have at least five years of service to receive the monetary credit plan.

Retirement Formula

Defined Benefit Plan

This option provides a defined benefit of 3.75 percent of the highest 12-month average salary per year of service, up to 75 percent for judges reaching age 65 with at least 20 years of service. Optional settlements are available which reduce a judge’s retirement allowance to provide a lifetime benefit for a surviving spouse upon death of the judge.

Monetary Credit Plan

This option provides a cash payment in a single lump sum, or the member may elect to receive an annuity at retirement based on the accumulated contributions of the employee and the employer. To receive the annuity a judge must meet the minimum qualifications required under the defined benefit plan. Lifetime benefits are not provided under this plan.

Disability Retirement (Non-Work Related)

Judges who have five years of service and become permanently disabled because of a mental or physical disability may apply to the Commission on Judicial Performance for disability retirement.

An allowance is based on the judge’s age and will be the amount equal to the lower of the following:

- the monthly benefit of 3.75 percent of the final compensation multiplied by the number of years of service the judge would have been credited had the judge continued to work until the age the judge would have first been eligible to retire, or
- 65 percent of the judge’s average monthly salary during the 12 months preceding the retirement date.

Disability Retirement (Work Related)

Judges receive 65 percent of the judge’s average monthly salary during the 12 months preceding the retirement date, regardless of age or length of service.

Judges’ Retirement System II Program Data (continued)

Death Benefits (Before Retirement)

Eligible for the Defined Benefit Plan

Spouses or registered domestic partners receive either the monthly retirement allowance equal to one-half of the judge’s defined benefit plan allowance or the judge’s monetary credits. At any time while in office, a judge may make an irrevocable election for their eligible surviving spouse or registered domestic partner to receive the maximum survivor benefit (Option 2) in the event of the judge’s pre-retirement death.

Eligible for the Monetary Credit Plan

Spouses or registered domestic partners receive the judge’s monetary credits or three times the annual salary at the time of death, whichever is greater.

Death Benefits (After Retirement)

Defined Benefit Plan

Judges retiring on the defined benefit plan are offered the choice of one of four optional settlement benefits to increase the survivor benefits to their eligible surviving spouse or registered domestic partner.

Monetary Credit Plan

If the judge elected to receive the monetary credit plan in a lump sum, there are no survivor benefits. If the judge elected monetary credit plan in an annuity, the spouse or registered domestic partner receives a lump sum payment of the remaining funds at the time of the judge’s death.

Cost-Of-Living Adjustments (COLA)

The retirement allowance of retired judges who have elected the Defined Benefit Plan will be adjusted every January after the judge has been retired six months. The adjustment is based on the United States city average of the Consumer Price Index For All Urban Consumers, as published by the United States Bureau of Statistics. This adjustment will not be less than 1 percent or more than 3 percent.

Legislators’ Retirement System Program Data

Primary Benefits

CalPERS has administered the Legislators’ Retirement System (LRS) since its inception in 1947. The duties of the Board with respect to administering the LRS are the same as for CalPERS on such items as determining membership and benefit rights, making investments, crediting interest, and obtaining information necessary for administration.

Benefits payable by the LRS are financed through member contributions, the State’s contribution as an employer, and interest earned on investments. The employer statutory contribution rate was eliminated in January 2000, and the CalPERS Board is now authorized to establish actuarially determined rates.

When the actuarial value of the assets exceeds the present value of benefits, resulting in a 0 percent employer contribution rate, the Board may reduce the member contribution rates for the same fiscal year in which the State rate is 0 percent. For fiscal year 2005-06, the Board has determined that both the employer rate and the member rate will be 0 percent. Interest credited to the member’s accounts is the net earnings rate of investments.

Proposition 140

Proposition 140, the Political Reform Act of 1990, requires that Legislators (Senators and Members of the Assembly) first elected after November 7, 1990 participate in the federal Social Security program and in no other retirement system.

Membership

Members of the Legislature serving prior to November 7, 1990, elected Constitutional Officers, and Legislative Statutory Officers are eligible for benefits.

Service Retirement

Retirement Age

The retirement age is 60, with four or more years of service credit, or any age with 20 or more years. The retirement age for Legislative Statutory Officers is 55, or any age with 20 years or more of service credit.

Members of the Legislature Benefit Formula

The retirement formula consists of three separate formulas that are totaled together to provide the members with their allowance. The first part of the formula consists of 5 percent of the first \$500 of salary up to 15 years of service. The second part is 3 percent per year of the same \$500 of salary for years in excess of 15 years. And finally, total years of service is multiplied by 3 percent per year of their salary above \$500. In no case may a member receive more than two-thirds of their salary.

Constitutional Officers’ Benefit Formula

Five percent per year of service up to eight years (40 percent) of their highest salary. If the member has 24 or more years of service, the retirement allowance is 60 percent of their final salary.

Statutory Officers’ Benefit Formula

Statutory Officers receive 3 percent per year of service, not to exceed 66 percent of final monthly compensation.

Early Retirement Options for Members of the Legislature & Constitutional Officers

Legislators and Constitutional Officers may retire before age 60 with 15 years of service. However, their retirement allowance is reduced by 2 percent for each year they retire before age 60.

Legislators’ Retirement System Program Data (continued)

Disability Retirement

Disability retirement uses the same formula as service retirement. There is no reduction if retirement is before age 60 for members of the Legislature.

Death Benefits (Before Retirement)

Not Eligible to Retire

One month’s salary for each year of service, plus the return of the member’s contributions with interest payable to a survivor.

Eligible to Retire

If the member has elected one of the optional settlements, their beneficiary will receive the benefit provided by the option selected, calculated as if the date of death had been the date of retirement. In lieu of this benefit, the beneficiary may elect an allowance of one-half the unmodified retirement allowance, payable until death or remarriage.

Death Benefits While in Office

Beneficiaries receive a lump sum benefit in an amount equal to the annual compensation of an LRS member during the 12 months preceding the member’s death, regardless of whether the member was eligible to retire.

Death Benefits (After Retirement)

Members choose between one of four options. The level of survivor benefit is based on the option chosen, without a reduction in allowance for members of the Legislature, Constitutional Officers, and Statutory Officers receive a reduced allowance based on their age at time of retirement and the option they choose. Beneficiaries also receive a \$600 lump sum payment.

Cost-Of-Living Adjustments (COLA)

The annual COLA is determined by the Consumer Price Index.

Notes:

¹ CalPERS began reporting Average Benefit Payments in the June 30, 2006 Comprehensive Annual Financial Report. Additional years of information will be added each year as it becomes available to provide a six-year review.

² These averages and totals are for retired members, beneficiaries, and community property recipients.

³ Beneficiaries of LRS members do not receive a benefit calculated from an average monthly compensation. It is based on a percentage of the member's benefit (which has been increased by yearly cost-of-living adjustments). As a result, Average Final Compensation information does not include salary averages for beneficiaries.

Volunteer Firefighters’ Length of Service Award System Program Data

Primary Benefits

The Volunteer Firefighters’ Length of Service Award System, administered through CalPERS, was established in 1980 as a way for fire departments to offer their volunteers monetary acknowledgment for their service. A fire department contracts with CalPERS to handle the administration of length of service benefits to its volunteers who follow the program guidelines. All costs for the program are paid for by department contributions. There are no contributions from volunteers. An actuarial valuation is conducted at the start of the contract to determine the contributions required.

Service Awards

A volunteer member with 20 years of service credit can receive \$1,200 annually for life (paid in monthly installments). The minimum award a volunteer can receive is \$600 annually for life for 10 years of service. A \$3,000 lump sum death benefit is payable to the named beneficiary of any member of the System with 10 or more years of service. It is also payable to the named beneficiary of an award recipient. The death does not have to be the result of an in-the-line-of-duty accident.

Deferred Compensation Program Data

By saving for the future, CalPERS members can face the road to retirement with confidence. CalPERS helps by providing an important tool to meet future needs — the CalPERS 457 Deferred Compensation Program. As of June 30, 2006, this program was adopted by 567 public agencies compared to 524 last year.

During fiscal year 2005-06, membership grew to 21,542, up from 19,455. Assets increased from \$442.8 million to \$540.3 million, as a result of \$97 million in contributions and transfers, investment gains of \$36 million, and distributions and withdrawals paid to participants of \$35.5 million.

Designed with high standards of quality and service, the CalPERS 457 Deferred Compensation Program is a way to defer a portion of pre-tax salary into investments of an individual's own choosing. It is a deferred compensation program that allows both the amount deferred, and the amount earned on the investment, to be protected from income tax until the money is taken out during retirement. The program complements the retirement benefit plans offered by CalPERS.

State law enacted in 1990 allowed CalPERS to make the deferred compensation program available to all California public agencies. This includes counties, cities, special districts, and school districts. The CalPERS 457 Deferred Compensation Program meets all federal requirements of eligible deferred compensation plans organized under the Internal Revenue Code.

The program offers participants 14 investment options. Eight separate core funds have been created specifically for this program, or participants can choose from three lifestyle options that automatically invest their money in a conservative, moderate, or aggressive investment mix of core funds. All of these funds are managed by CalPERS staff and its professional investment managers, according to strict investment objectives and performance standards set by the CalPERS Board of Administration. In addition to the core funds and lifestyle funds, participants are offered options to invest in federally-insured bank certificates of deposit, an Insured Money Market Account, or through a discount brokerage service that lets them select from more than 4,000 retail mutual funds through a self-managed account.

Participating Public Agency Summary

Counties	18
Cities	89
Community Services Districts	22
Police & Fire Protection Districts	41
Health Agencies	5
Housing Authorities	9
Insurance Groups	11
Irrigation/Reclamation Districts	10
Libraries	13
School Districts	123
Water Districts	64
Other Districts	93
Other Public Agencies	69
Total	567

The CalPERS Board controls the investment and administrative functions of the CalPERS 457 Deferred Compensation Program. The assets are held in trust by the Board for the exclusive benefit of participating employees, which adds security.

The program delivers its investments and services at low cost through a simple fee structure. There are no hidden costs or restrictions on investments. Total fees for administration and investment management of the core funds are less than 1 percent, half of what other programs typically charge. By paying less in fees, participants are able to invest more and earn returns building up their account over time.

Deferred compensation programs provide an immediate tax break and the advantage of the full earning power of the investor's money. Because earnings automatically reinvest tax free, the savings potential grows significantly over time. The CalPERS 457 Deferred Compensation Program offers valuable trust protection public agency employees can count on to secure their retirement savings.

The financial statements for this program are in this report as part of the Financial Section and the accompanying notes and schedules.

Long-Term Care Program Data

The CalPERS Long-Term Care (LTC) Program provides financial protection to members from the high cost of extended personal care that may be caused by illness, injury, or the frailty of old age. Six out of every 10 people over the age of 65 will need long-term care during their lifetimes. Unfortunately, these types of personal care services are not covered by traditional health insurance or Medicare.

The CalPERS LTC Program is a self-funded, not-for-profit, member-paid program that continues to add members seeking these invaluable personal services coverage. During the fiscal year 2005-06, membership remained stable at approximately 174,000 and annual premiums were more than \$244 million for the same period. Additionally, the

Program's reserve grew to approximately \$1.78 billion and approximately \$78 million in benefits were paid on behalf of members, bringing the total benefits paid since the Program's inception in 1995 to approximately \$304.6 million.

Our LTC Program continues to be the largest and most respected long-term care program of its kind in the nation. Entering its 11th year, the CalPERS Long-Term Care Program is devoted to providing the best long-term care coverage with affordable premiums.

The financial statements for this program are in the report as part of the Financial Section and the accompanying notes and spreadsheets.
